It was around this point that a town started its rapid growth. It was first named Crofton in honor of one of the donors of the land for the town. In 1872, a postoffice came into being. Later the town was named Winston and was incorporated as such in 1878. Winston grew rapidly having three and sometimes four doctors, three attorneys, drug stores, general merchandise stores, grain and lumber dealers, livery stables, a newspaper, millinery shops and a hotel. The population at one time grew to between 600 and 700. In 1937, the population was 400 but, in 1979 it is less than 200.

The Chicago, Rock Island and Pacific Railroad and depot were responsible for the growth and prosperity of Southwest Daviess County and the town of Winston.

Prairie City Site
#43 Appendix

Whether or not many people lived in Prairie City, there is little proof; however, names of buyers of specific lots are recorded in the Abstracts and Index of Deeds.

In the first transactions John Vancil was the grantor or trustee. The first recorded purchase was on February 11, 1858. On this date, Moses Daniel purchased Lot 1 in Block 6. On February 11, 1858, Silas Pryor purchased Lots 3 and 4 in Block 3, and John Wilson purchased Lots 1 and 2 in Block 2. On October 2, 1859, Henry Tomlinson bought Lot 5 in Block 2 and Lot 2 in Block 4.

Lots continued to be purchased until 1870. Some of the purchasers were John Daniels, Richard Daniels, Saul C. Davis, Beverly D. Edwards, Ira O. Scott, Henry Cline, John Richards, John A. Dunn, Henry M. Collins, William Creekmore and Wilbur K. Nation.

The location of the Prairie City site is given in the description of the purchase of lots by Elias Vancil from Samuel C. and Catherine C. Davis. In this description the town was located in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 34, TWP 61, Range 27. The land was later purchased by John A. Dunn, and was also owned by Roy Troxel. It is now a part of the Landmark Farm, owned by Morris Clairmont and William Boyd.

Daviess County histories recognize the existence of Prairie city, but they give the readers little information about the town. The History of Daviess and Gentry Counties includes the following statements:

The Plat of Prairie City, located in the northern part of the county, was filed by J.R. Vancil on June 1, 1857. As late as 1870, the village had an assessed valuation of \$365, but at that time it had practically disappeared.

Thus it could hardly disappear if it had never existed. The History of Daviess County, 1882 states that "its history is more of tradition than actual fact." This history does, however, list the names of nine men who were inducted into the army from Prairie City during the Civil War. There were James C. Harrah, Jonathan Poe, Abraham Poe, William H. Royston, Benjamin Poe, James M. Royston, Elisha Barber, George W. Clore and Benjamin F. Royston.

Realistic evidences came from a conversation with Roy Troxel, who farmed the land where some of the buildings stood. He stated that he had often plowed up tools, as well as glass and crockery, and once discovered a well, all evidence of a settlement.

The Christian Church established in 1897 near the location of the town, was named the Prairie City Christian Church. It likewise has gone the way of the old city.

Grand River Baptist Church
#9 Appendix

SW cor of the Lot in SW cor of W $\frac{1}{2}$ of NE $\frac{1}{4}$ of Sec 17, TWP 60 N R 27 W

#43 Appendix

On December 14, 1833, in a log-cabin home located near Grand River in Ray County (later Daviess County), eight pioneer settlers, assisted by Elders John Stone and William Turnage of the Fishing River Baptist Association, constituted the first organized church in Daviess County and the first Baptist church in Northwest Missouri. They named the church the United Grand River Baptist Church, but later changed the name to the Grand River Baptist Church. Charter members were William and Nancy Gee, John and Ruth Tarwater, Abigail Morgan, Sarah Thornton, and George and Delitha Rhodes.

During the first eight years the members met once a month on Saturday afternoon and on Sunday morning either in homes or in surrounding groves for their worship services. In 1842, Moses Netherton, deacon of the Church, received from Benjamin F. and Susannah Smith in exchange for one dollar, an acre of land from their homestead for the purpose of building the first Grand River Baptist meeting house. This log cabin structure, furnished with split log benches, was located on the SW cor of the W $\frac{1}{2}$ of SW $\frac{1}{4}$ of Sec 26, TWP 60, R 27. Here the members met during the next twenty-four years with some occasional meetings in homes or in the Craven and Pugh school houses.

In 1864, James N. and Nancy Netherton gave to the Church in exchange of \$20, two acres of land in the W $\frac{1}{2}$ of SW $\frac{1}{4}$ of Sec. 17, TWP 60 R 27 for the purpose of erecting a new church building. The trustees--Alexander Croy, John Railsback, and Eli Walls--transacted the exchange, sold the log church building for thirty dollars with twelve month's credit, and planned the construction of the new building. The building, erected in 1866, was a white frame rectangular building with the traditional two doors. In 1878, and again in 1895, the building was enlarged and redecorated.

In 1918, plans were made to erect the third building, as the membership had exceeded the size of the second church building. The building committee consisted of Thomas Brown, Hadley Brown, John Carter, Enoch A. Croy and Joseph Jenkins. Carpenters, assisted by members of the church, were George Johnson Thomas Brown, and Hadley Brown.

Although the Church remained inactive from 1971 to 1979, it has continued to be an organization. Special Christian services are now being held in the Church building during the summer and fall months.

1st Jameson School House
#43 Appendix

On March 19, 1914, the first consolidated school in Missouri was organized in Grand River Township. It was named the Jameson Consolidated High School. The district included a portion of five rural school districts and the town of Jameson, an area of thirty-seven square miles surrounding the town. These rural schools were Grant, located in the SE cor of the SE $\frac{1}{4}$ of Sec 13, TWP 60 N R 28 W; Brown in the SW cor of the NW $\frac{1}{4}$ of Sec 29, TWP 60 N R 27 W; Laswell in the center of the W line of the SW $\frac{1}{4}$ in Sec 16, TWP 60 N R 27 W; Brushy Creek in the NE cor of the W $\frac{1}{2}$ of the SW $\frac{1}{4}$ of Sec 35, TWP 60 N R 28 W; and Beck, located in Liberty TWP.

In April, 1915, the School District began to erect a new brick building at a cost of nearly \$20,000. The contractor was Henry Sutton of Bethany, MO. The first day of school in the new building was October 4, 1915, when horse-drawn school wagons brought students from the five rural school districts. Enrollment the first year was 257.

Not only was the Jameson School the first consolidated school in Missouri, but it was also the first school in the state to have vocational home economics and vocational agriculture departments. In February, 1918, the Jameson School was approved by the State Department of Education.

The district was increased in area by the inclusion of five other rural school districts--Scotland, Netherton, Barnett, Goodbar, and Stoney Point.

Site of the First Store in Jameson
#43 Appendix

Sec. 13, TWP 60 N R 28 W. This land was first entered by Charles A. Cravens and William E. Barber. It was purchased by Henry Briggs on January 24, 1868. Here a surveying party from Chillicothe laid out a townsite, completing the task on June 12, 1871. The town was named Jameson for one of the railway officials. On the following Monday, Benjamin G. Kimball, an appointed agent for the town, began the selling of lots at \$100 each. In October the Feurt Summit Post Office located in the S $\frac{1}{2}$ SE $\frac{1}{4}$ of Sec. 13, TWP 60 N R 28 W, about one mile west of the new townsite, was moved to Jameson.

Evidences that Jameson would become an active business center was revealed when "24 cars of grain and 53 cars of stock" were shipped from the new town during October and November, 1871, the first year of the town's existence. This led to the need of a hotel, so on February 21, 1872, Elijah and Eliza Ann (Brown) Hubbard purchased Lot 17 in Blk 14 at the NW cor of first and Chestnut Street and built a hotel which they called the Jameson House.

New residents and business men began to come into the new town. On June 3, 1872, Herbert D. White purchased Lot 33, blk 4 and built the first business house, a small frame house in which he opened a grocery, confectionery, and a restaurant. A second business house was erected by David Threlkeld and James F. Hamaker in Lot 31, Blk 4 on Second Street on January 3, 1872. William McCoy opened a livery and feed stable on Lots 17 and 18 in Blk 15, and J.W. Wanamaker became the first blacksmith and wagon maker. His shop was located in Lots 19, 21 and 22 in Blk 24. On April 4, 1873, Albert O. Siple purchased from Napoleon B. Brown and Elijah Hubbard Lot 21, Blk 4, where he established a hardware store and continued his skill as a tinner and a mechanic. James Leeper purchased lot 16, Blk 5, where he established a lumber yard.

In the fall of 1872, Lot 9 in Blk 2 was set aside for the first school building. During the winter months of 1872 and 1873, a one-room school house was built on this lot and a three-month summer subscription school was organized by Miss Martin. Because of the lack of support, however, the school lasted only a few weeks. The following year the town organized the first regular district school, which began in the fall of 1875. The building of the former school was divided into two rooms, and Mr. and Mrs. Heath Swisher became the teachers for the winter term of 1873-1874.

The first church constituted in the new town of Jameson was the Christian Church constituted on March 24, 1872 under the direction of the Reverend D.W. Martin, minister. Charter members were Mr. and Mrs. John A. Brown, Mr. and Mrs. A.S. Andrews, Mr. and Mrs. William McCoy, Mr. and Mrs. David Threlkeld Mrs. Catharine Shrum, Eliza A. Guthrie, Melseni Brown, and Nancy C. Brown. The first church building was erected in 1875, and dedicated on July 4, 1875. The elders were John A. Brown and W.S. Brown; the deacon, Erris A. Perry. The present church building was built in 1897, the architects being Felt and Carr of St. Joseph and the contractors, the Clark Brothers of Jameson. On October 12, 1876, Jameson was incorporated into a town. Trustees were A.O. Siple, W.T. Stovall, J.M. Raley, A. Ingraham, and S.F. Howell.

#43 Apperdix

the vicinity of the town of Cravensville, possibly between Cravensville and the area where the post office of Feurt Summit was located.

As recorded in the Official Records of the Union Confederate Armies, fourteen men of the First Regiment of Cavalry, Missouri State Militia, under Lieutenant Goodbrake, and twenty-one militia, under Captain Vicers were "fired upon from brush by eighty-five guerrillas under Davis and Kirk" on August 5, 1862. According to the official record the encounter lasted for about an hour and a half and resulted in the defeat of the guerrillas, six being killed and ten wounded; while only five men of the militia were wounded.

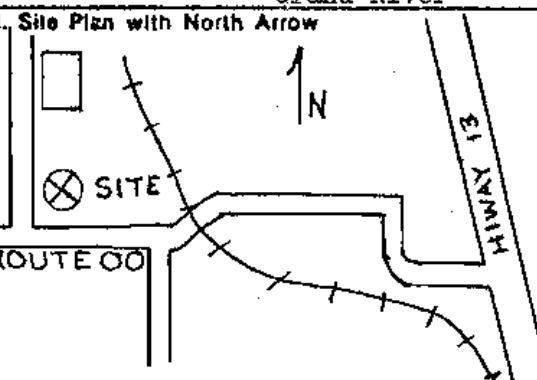

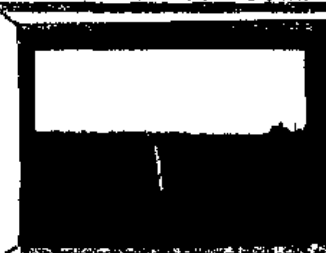

According to John F. Jordin, however, Jesse Clark of Mercer County came to Daviess County and organized a small rebel company by convincing them that there were other Confederate sympathizers in surrounding counties ready to join their company. However, when they found few followers in Mercer, Schyler, Harrison, Worth and Gentry Counties, they returned home only to meet Federal troops, under the command of Captain Woodrow near the old site of Adam-on-di-Ahman at that time Cravensville. Conflict began at once and lasted throughout the day.

In Jordon's account about fifteen rebels who possessed guns held off the Federal troops until their unarmed comrades could escape. He contends that only two rebels were captured: Charles Gobin, who was wounded and Thomas Hicklin, who became lost from the company. The Federal officers, desiring to learn the names of the men in the rebel company, commanded Hicklin to give to them their names and threatened him if he failed to do so. When he refused to betray his friends, he was taken out on the prairie, where he became a victim of a firing platoon of Federal soldiers. He gave his life for his friends.

Gutherie Spring
#43 Appendix

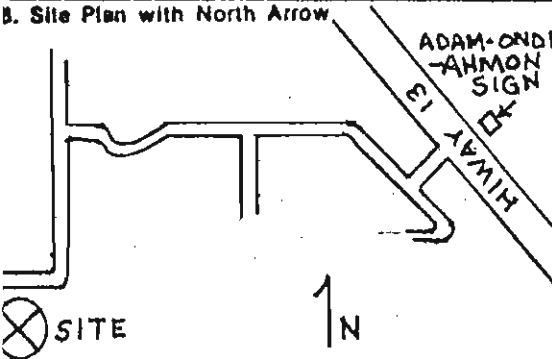

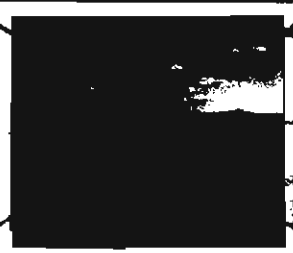

Not only does the spring continue to flow during periods of drought, such as the one during the summer of 1936, when farmers throughout the county hauled water from this spring, but it also contains valuable minerals. Because of these minerals the water does not freeze in the winter, but neither will it make steam when it is boiled. Corbin Feurt, grandson of Thomas Feurt, contends that the farmers discovered this fact when they attempted to use the water in the early steam threshing machines. He also says that its medical qualities were detected when farmers drank generously of the water when they were very hot and experienced no ill effects, as is often true in drinking to excess water without minerals.

Other known springs in Grand River Township from which the early settlers drew their water supply are found near the Gutherie Bridge that crosses Grand River and on James Johnson's farm. In 1838, Henry Mills chose the present Johnson farm for his home because of this spring, a vital part of any pioneer family.

Cravensville Site
#9 Appendix

SW Cor of W $\frac{1}{2}$ of SW $\frac{1}{4}$ of Sec 30, TWP 60 N R 27 W; SE cor of E $\frac{1}{2}$ of SE $\frac{1}{4}$ of Sec 25, TWP 60 N R 28 W.

#43 Appendix

Within one year after the exodus of the Mormons in 1838, Dr. John Cravens, a native of Virginia, established a new town on the site of the Mormon settlement, Adam-ondi-Ahman. The village was called Cravensville.

According to a description of the land transferred to Dr. Cravens in October 1839, the town of Cravensville was located in the north portion of the NE $\frac{1}{4}$ of Sec 31 of TWP 60 N R 27 W and a portion of the NE $\frac{1}{4}$ of Sec 36 TWP 60 N R 28 W, which is within the area known as Adam-ondi-Ahman.

The town was divided into at least eighteen blocks, each block having from eight to ten lots, enclosed by North Street on the north, East Street on the east, South Street on the south and Grand River on the west. From October 1839, through January 1868, lots in the town were bought and sold; however, the History of Daviess and Gentry Counties states that Cravensville had only ten to twelve houses and only about sixty inhabitants.

Some of the purchasers of lots in Cravensville were John Dritt, John Byrd, William B. Johnson, William Pyles, G. Green, Joseph Breeden, William Stephenson, Gabriel R. Byd, M.T. Green, David Terry, Christopher Dritt, Joseph Speaker, Charles A. Cravens, Erastus Lewis, John B. Stokes, Garnett L. Witt, Wilbur K. Nation, James Dixon, Adam Clendewen, Harriet Weaver, Andrew Smith and W.D. McDonald.

Cravensville became the general post office for the western portion of Grand River Township, and most histories state that there were several businesses. The names of only a few businesses, however, have been recorded. Benjamin G. Kimball, who came to Missouri in 1837, arrived in Cravensville "with a stock of dry goods and a general assortment of merchandise," which he placed in one of the buildings and started one of the first businesses. Joseph D. Feurt from Scioto County, Ohio, settled in Cravensville in 1840 and opened a blacksmith shop.

There were also professional citizens in Cravensville. Records reveal that Dr. W.S. Brown from Preble County, Indiana, came to Cravensville in 1848 and practiced medicine until 1851. History of Daviess and Gentry Counties records five doctors who lived at one time in Cravensville. These were E.M. Breeden, G.D. Pyles, R.M. Robertson, K. Scott and John Cravens, the founder. Lawyers in Cravensville were B.M. Butler and S.B. Guthrie.

Cravensville Site

Page 2

#43 Appendix, Cont.

Dispute arose among the citizens of the county concerning the placing of the county seat within a half mile of the geographical center of the county rather than in Gallatin. In 1840, 93 of 280 taxpayers signed a petition for the removal of the county seat from Gallatin to Cravensville. Their contention was that Cravensville was the rightful place for the Seat of Justice because of its location and that Gallatin should not be the County Seat; "because Gallatin was located in that part of the county which is mostly prairie and cannot admit so dense a population as the parts lying west, northwest, and north and east of the center of the county, with the elements necessary to make settlements." According to tradition, Judge M.T. Green threw the petition to the floor and stamped on it.

Again in 1865 and 1866, another attempt was made to change the county seat to Cravensville, but at that time some of the inhabitants in Cravensville had gone south and eventually Cravensville began to disappear.

Adam-ondi-Ahman
#6 appendix

To visit the land which the Mormons claimed in 1838, and which is now owned by the Church of the Latter Day Saints (Mormons) of Salt Lake City, Utah, one follows Highway 13 to a marked gravel road southeast of Jameson. This road leads to Tower Hill, where one sees a rocky area which the Mormons contend is the "ruins of Old Nephite and Adamic Altar of Prayer."

#9 Appendix

Sect. 30 and 31 of TWP 60 N R 27 W and Sect. 25 and 36 of TWP 60 N R 28 W.

#43 Appendix

These histories state that this area was claimed by Joseph Smith, the Mormon leader on May 20, 1838, as the settlement for the followers of the Mormon faith. Smith contends that he had been informed by the Lord upon two different occasions to claim this land even before the Missouri Legislature had created the two new counties, Daviess and Caldwell, as the home for the traveling Mormons.

Following the directions given by Joseph Smith, the Mormons believed that Adam-ondi-Ahman was the home of Adam and Eve after they were driven from the Garden of Eden, which according to their belief was in Jackson County. They anticipated that Adam, renamed Michael the Ancient of Days, would return to Adam-ondi-Ahman in the final days to meet with the prophets and patriarchs.

From Tower Hill, one sees a rocky area which the Mormons contend is the "ruins of Old Nephite and Adamic Altar of Prayer." A path from Tower Hill leads to the foundation of Lyman Wight's house. From here one can go into a valley which historians identify as the place where the Mormons and permanent citizens of the county met in conflict after the Mormons had attempted to assert their rights to vote in the county election.

To the northwest of the valley is Spring Hill which is the site of the Adam-ondi-Ahman village. Joseph Smith asserted that the Lord named the site. The village, a two-mile square plot, was located near Lyman Wight's ferry on the Grand River. Each family was given a one-acre lot upon which to build a log cabin.

(Continue to next page.)

Adam-ondi-Ahman
#43 appendix cont.

According to Herber Kimball, a four-acre plot in the center of this site was laid out for the temple, which was dedicated by Brigham Young, in the presence of over 500 members. The temple, however, was never built. On this site is a rock formation, now scarcely visible, called Adam's Altar of Sacrifice. South of the temple site the settlers erected a common storehouse, the only brick structure in the settlement.

Life of the Mormons in the Adam-ondi-Ahman area was brief, as the last Mormon left Grand River Township before December 1838, less than a year after their arrival. Some settled in Far West for the winter and then travelled to Commerce, Illinois, later named Nauvoo. After Joseph Smith's death in Nauvoo, some became followers of Brigham Young who went to Great Salt Lake Valley in Utah; others found homes in Illinois and Independence, Missouri.

Adam-ondi-Ahman
Appendix #43

BYU archeological-Historical Team Concludes Mormon Site Summer Work.
September 1, 1979 Gallatin North Missourian

The Brigham Young University research team concluded its summer work at Adam-Ondi-Ahman this week and left yesterday to return to the university at Provo, Utah. The archeologists plan to finish their work next summer.

Approximately 10,000 artifacts were catalogued by the researchers for the Mormon Church. Many of these artifacts will be stored at a museum at BYU, and a season report summarizing the study's results will be prepared and submitted to the Church as well as to local landowners. There is no further analysis of the artifacts planned.

"What we mean by artifacts are really worthless to most anyone else," Dr. Ray Matheny, head archeologist of the group says. "We did find a few old coins but the total value of all coins amounted to less than \$10, including that 1826 half dollar.

"By artifacts we include badly deteriorated things such as bits and pieces of nails, glassware, lead balls-all perfectly worthless. For instance, we've probably catalogued 3,000 to 4,000 bits of window pane. Our reasons are that window pane glass is easier to identify and date than other artifacts and their location in excavation help reveal the position of the house."

A total of 18 buildings were located during their summer work. Bob Carter, a survey team member, found a deposit of iron ends among the ruins of one structure, which is now thought to be the blacksmith shop since the excavation work correlates with the historical account of a blacksmith shop operating in the area in 1840.

"What is commonly known as the Bishop's Storehouse in Alvin Dyer's book, 'The Refiner's Fire,' may have actually been the community's brick clamp or kiln," Dr. Matheny says. "Our trenching revealed that the patterns of brick ruins could have been used in the making of bricks and

several glazed bricks were uncovered. There was also about six inches of charred ground underneath brick layers. In fact, the ground had been fired so much that it had become magnetic and the ground was detected as metal on our instruments."

Although the group hoped to luck into a Mormon latrine pit which have proved to offer numerous artifacts at other Mormon historical sites, no pits were found at Adam-Ondi-Ahman. The survey team did not closely examine wells that were discovered since the digging was too tedious for the results available.

"We really didn't get as much done as we wanted," Dr. Matheny said. "We were frustrated by a number of things, including the rain which kept us from working for six or seven days." Team members did comment, however, that local Daviess County officials and residents were cooperative in helping them in their study.

"The location of the temple site may have changed due to our work this summer," Dr. Matheny said. "And the size of the old town now seems smaller than what we first anticipated. Originally we believed that the town covered at least a full square mile, but we've found that most of the town was down in the Grand River bottom. The 1909 flood as well as numerous farm plowings have really made a lot more excavation futile."

Historian Steve LaSueur commented on the tangent of Cravensville, the town which emerged following the exodus of the Mormons from the area. According to an 1840 census, Cravensville less than a year after the Mormons fled was larger in population than Gallatin. At the time when Cravensville attempted to gain the county's seat, its population was 92 while Gallatin had a population of 81.

LaSueur also checked out the account which relates that four doctors were practicing at Cravensville. He did

Adam-ondi-Ahman

#43 Appendix

BYU archeological

find the account but remains skeptical since the same source identifies Cravensville's population at 286—a fact which cannot be verified by archeological studies so far or by other historical accounts.

Most of the artifacts collected were from the Lyman Wight cabin which was erected in 1833. Activity pivoted on this site since it was the only known identified place at the site.

No original plat of the town exists. The research team first worked off a verbatim description of the town by a man in Utah who had never seen this area. In his description, he misplaced the river, and consequently the plat available was not accurate.

The location of the Mormon temple was supposed to have been on the highest point in the area. By surveying methods, the BYU team realized that

this point lies to the northeast of where the temple was previously thought to be.

The archeological-historical work begun this summer is the first actual digging at the Mormon shrine near Jameson. The Mormon Church owns some 1,415 acres of land at and surrounding the shrine which is publically marked as a historical site.

When funds are available, the Mormon Church may well develop Adam-Ondi-Ahman into an attractive visitor's center. Brice Dustman living near the Mormon shrine estimates that 30,000 to 40,000 people stop to walk the area considered sacred ground in the Mormon belief.

"Next year we plan to further test and identify the plat of the old town and to eventually locate the exact temple site," Dr. Matheny says.

Log Cabin (Henry Mills Home)
#43 Appendix

The first of these log cabins is on James Johnson's farm, located southeast of the present town of Jameson in the NE $\frac{1}{2}$ of Section 32, TWP 60 N R 27 W. Henry Mills built the cabin soon after he purchased the land in April, 1839. The land remained in the Mills family until it was purchased by Mr. & Mrs. James Johnson.

This cabin is built of broad-ax hewn horizontally shaped oak logs, each approximately twelve inches square. At each corner of the structure, the logs are shaped and wedged securely. Some form of concrete mortar mixed with small sticks can still be seen between some of the logs. A large opening on the west side of the building was probably the opening for a fireplace. Some of the window and door frames made of smooth boards may have been added at a later date.

According to Annabel Wilkerson, Henry Mill's great-granddaughter, the cabin had a loft and a "lean-to" on the east side of the house.

42. Further Description of Important Features
The cabin was made of logs that were approximately twelve inches square and wedged securely at each corner. The building was twenty feet long, sixteen feet wide, and fourteen feet high. It contained a narrow steep spiral staircase. The structure was torn down in the winter of 1978-1979.

43. History and Significance
This log cabin dated from the pioneer days in Grand River Township, and was located on the farm now owned by William Houghton southeast of Jameson in the SE 1/4 of Sec 33 of TWP 60 N R 27 W. The cabin was thought to have been built by John Bird, who purchased this land in November 1838. This cabin was similiar in structure to the one (see appendix)

44. Description of Environment and Outbuildings
The cabin was the framework for a hay barn west of the house owned by Mr. & Mrs. William Houghton.

located on Mr. Johnson's farm; it too was made of broad-ax hewn horizontally shaped oak logs, each approximately twelve inches square. The building measured twenty feet long, sixteen feet wide, and fourteen feet high. The windows and doors had smooth frames, and one of the doors had three small glass windows, which were probably added after 1839. A unique feature of this structure was that it had a spiral staircase, narrow and steep, but especially interesting, this stair lead to a second story with a complete floor and at least some of the beams of the original cabin.

Gary Ellis Home
#32 Appendix

Hipped center gable-clipped gable/asbestos shingle.

#42 Appendix

structure. This is in vernacular style but does not interfere with the "Victorian" appearance of the structure.

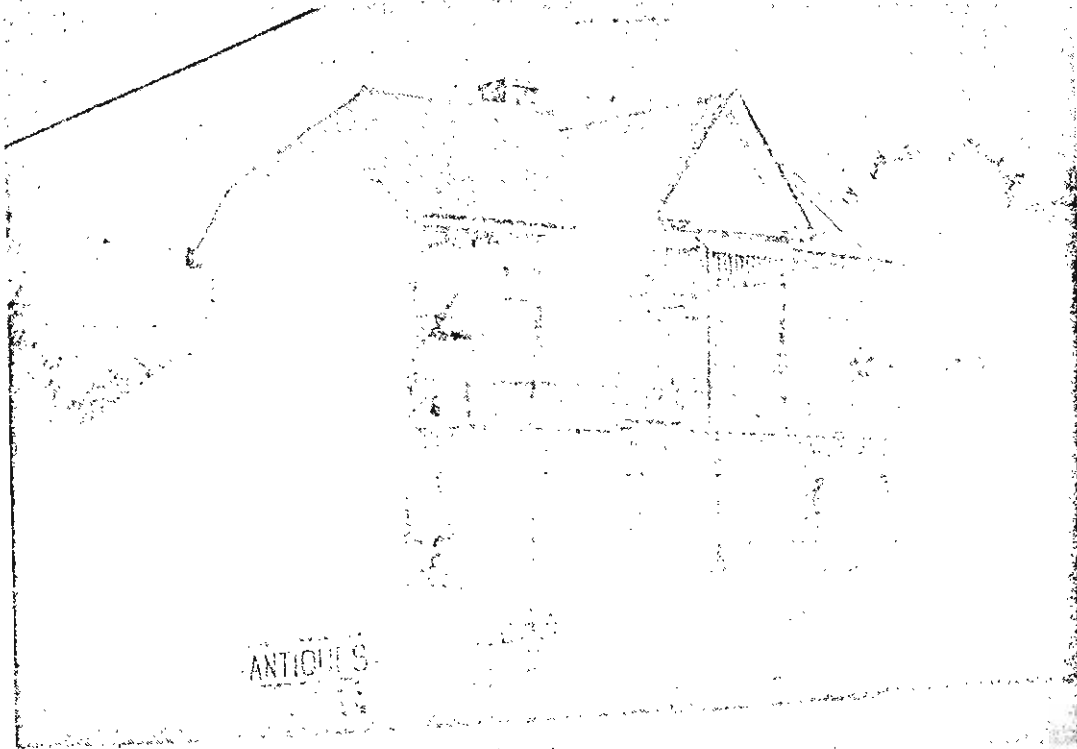

#43 Appendix

Home Opens For Tours

The Gary Ellis home in Jamesport will be opened to the public June 27 from 10 a.m. to 5 p.m. for tours as the Daviess County Historical Society's Bicentennial project.

The home is furnished completely with antiques the Ellises have been collecting for years. The home is one of the oldest in Jamesport, built about 1877 or 1878 by Joseph Chenoweth, who was a carpenter and built several homes in the area.

The public is invited to tour the home free of charge, but donations to the historical society will be accepted. Among the antiques on display or in use are a cherry linen press built in Daviess County in the late 1830s, a collection of Bennington pottery, pattern glass from the Victorian era, a large walnut bird's eye maple desk built in 1888 for a wedding present, a turn of the century divan and chair, a kitchen table and pine trestle table from the early 1800s and bedroom furnishings from the 1840s.

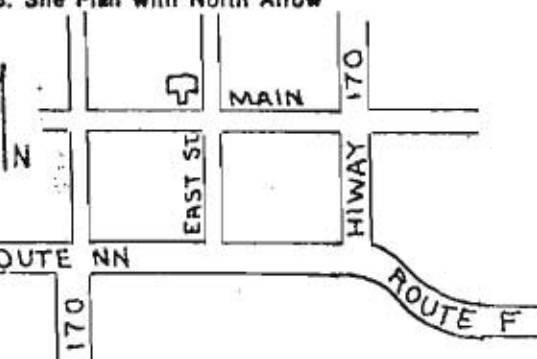

The Gary Ellis home in Jamesport will be open to the public for free tours June 27 as a project of the Daviess County Historical Society. The house is completely furnished with antiques.

Old Rock Island R.R. Bridge
#43 appendix

masked bandits went through the coach shooting wildly. Conductor Westfall, who failed to obey, was struck in the chest by two deadly bullets. Others who had gathered on the rear platform, dared to peer into the coach during a lull in the firing and a bullet crashed through the head of Frank McMillan, killing him.

Three of the bandits captured the baggage car and forced the expressman to open the safe from which they removed the contents, estimated from \$3,000 to \$15,000.

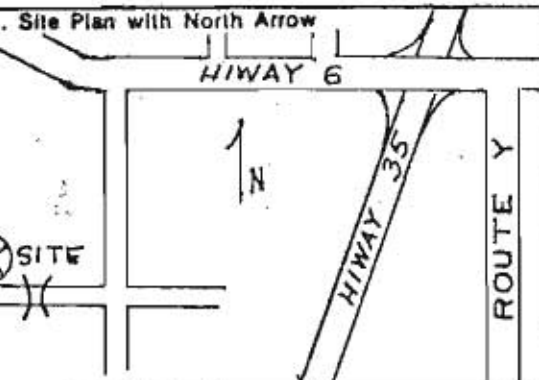

The scene of the hold-up was near this stone arch commonly called "the dump" and the horses were tethered in the woods close by. Mounting them they galloped away and although rewards of \$50,000 were offered for their capture, they remained at large many months.

It was an almost unanimous opinion that the James boys were leaders of the gang, since it was known that they had been in the country about Winston for several days and knew the lay of the land. Jim Cummins, the last survivor of the outlaw gang, who died in the Confederate Veterans' Home at Higginsville, MO, in July 1929, tells in a manuscript published after his death, of his hatred for Frank and Jesse James, the cause of it being Frank's accusation that Cummins was present at the Winston robbery and swore on the stand to that effect. Jesse also murdered Cummins' friend, Ed Miller, to rob him of his share of the spoils from the Winston hold-up. Frank was later brought to trail at Gallatin. The prosecution was handled by William H. Wallace, whose activities as prosecuting attorney of Jackson county broke up the James gang.

Victoria

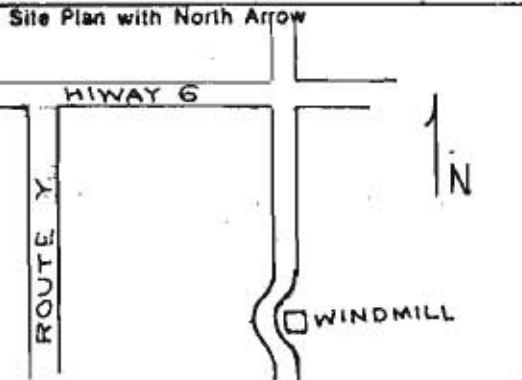

#43 Appendix

The A.F. and A.M. Lodge was organized in Victoria and continued there until 1879 when it moved to Winston. In the late 1860's the Chicago, Rock Island and Pacific Railroad came through southeastern Daviess County, but since it did not touch Victoria most of the businesses there began their move to what soon became Winston.

42. Further Description of Important Features
This is a site nomination, therefore no features are described. This 600 acre lake has 209 homes, 3 beaches, 2 pools. There are 2400 acres in the project with 2200 lots; a marina, grocery store and real estate office. A club house for all property owners and guests to use, with fishing, skiing, swimming and boating permitted on the lake. There are 19 miles of shore line.

43. History and Significance
All buildings must be approved by the building committee before construction starts. The Association Board is made up of six property owners, elected by property owners. Each serves a period of three years. All property owners pay membership dues each year. This is a private lake and to use it you must own property or be a guest of a property owner. A strict set of by-laws are enforced.

44. Description of Environment and Outbuildings
This is a summer recreation area.

43. History and Significance Civil Bend village was laid out in 1868, by Wilbert Canfield who surveyed 24 lots. The people, wanting to be civil and living close to a bend in the Grand River to the north, named the village Civil Bend. A doctor traveling with his family admired the place and bought land. He established the first doctor's office. (see appendix)

Civil Bend
#43 Appendix

John T. Price put up a 16-foot-square building for a store. The business life of the community increased to druggist, harness maker, blacksmith, hotel, barber, shoemaker and general store. Later a restaurant with grocery items working clothing and a post office in the back was present. Two good doctors, and an auctioneer soon settled in Civil Bend. Other buildings included the I.O.O.F. and Masonic Lodges, and two churches.

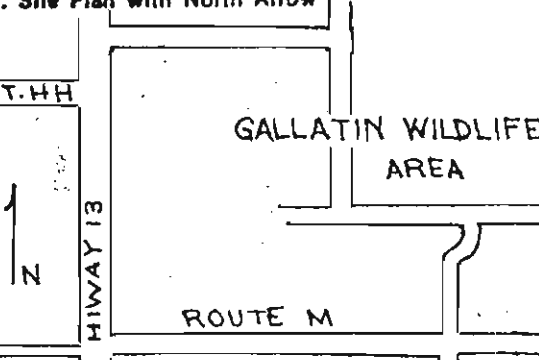

The Civil Bend Telephone was incorporated in 1912 and gave 24-hour service for \$10 a year for each customer. In 1921, four rural schools consolidated and used vacant buildings for grades and by 1925, a four-year high school was given a first class rating.

The United Methodist Church was built in 1888, with an addition added in 1914. There was an active congregation and Sunday services. By 1907, C.C. Reno's store was a landmark with necessary items for rural people. Mr. Reno also bought produce and the store served as a business, visiting and as a collecting place for half a century. In June 1972, both the store and school building were razed for Interstate I-35 right-of-way.

Springs in Grand River Township
#43 Appendix

On Carlin Sperry's Farm, located approximately one-quarter of a mile W of Highway 13, at the corner of County Road C, is Grand River Township's most valuable spring. The land on which this spring is located was purchased on April 7, 1853 by two brothers, Thomas and Grabriel Feurt.

Not only does the spring continue to flow during periods of drought, such as the one during the summer of 1936, when farmers throughout the county hauled water from this spring, but it also contains valuable minerals. Because of these minerals the water does not freeze in the winter, but neither will it make steam when it is boiled. Corbin Feurt, grandson of Thomas Feurt, contends that the farmers discovered this fact when they attempted to use the water in the early steam threshing machines. He also says that its medicinal qualities were detected when farmers drank generously of the water when they were very hot and experienced no ill effects, as is often true in drinking to excess water without minerals.

Other known springs in Grand River Township from which the early settlers drew their water supply are found near the Guthrie Bridge that crosses Grand River and on James Johnson's farm. In 1838, Henry Mills chose the present Johnson farm for his home because of this spring, a vital part of any pioneer family.

Millport site
#43 Appendix

Trade began to develop around the mill and the town grew.

Mr. Donaho built a blacksmith shop next to the mill. Josiah Martin opened a general store and John A. Williams received the first license for a grocery store. Lomax and Jacobs came from Richmond and opened a general store and later Worthington and Brothers and Morin and Compton operated a general store.

Trade developed around Millport with farmers coming from Sullivan and Ray County to have their grain ground into meal and flour. Millport continued to grow during the early years of the 1830's but once Gallatin was proclaimed the county seat the town began to decline. The final blow was the burning of the community during the Mormon raid in 1838.

McDonald Tea Room
#9 Appendix

Lots 10, 11, & 12 of Original Town of Gallatin, Blk 5 W & 2 S
Sec 20, TWP 59 N R 27 W.

#43 Appendix

Three generations of the McDonalds were born here and four generations have died here. Virginia McDonald & Charles named the place Maple Shade, partly after the beautiful maple trees in the front yard, and partly because her grandfathers plantation was named "Oak Shade." The first Mrs. McDonald, (Sue) is said to have stood under one of these maple trees and watched the James boys rob the Gallatin Bank on December 7, 1869.

Virginia McDonald's Tea Room opened on a now forgotten day in 1931. Immediately it became one of those places that folks told their friends about, and some of the folks were famous people like J.C. Penny and the late Arthur M. Hyde, who served as Governor of Missouri and the Secretary of Agriculture in Herbert Hoover's cabinet.

Within six years the tea room was listed in Duncan Hines. Within a decade it had been written up in many newspapers and national magazines. When Betty Crocker started a radio series on the most interesting restaurants in the United States, Virginia was the first person interviewed. How did it happen?

"The tea room was born of necessity," Virginia said. "I had been ill a long long time and I found my husband deeply in debt. I thought the only thing I could do was cook."

Later they opened a small grocery. To augment the income, he began selling hot dogs. This modest operation was expanded into the first tea room. It had a counter and three small tables, which McDonald made.

"I can't remember the day of the month," Virginia said. "But it was on a Monday in May 1931, I had 25 in for lunch. I cooked it, I served it, and I cleaned up afterwards. Later it got to be too much for me to do it all, so I got some help."

In the manner of Topsy, the tea room grew. Charles McDonald was a handy man with a hammer and saw, and without so much as a blueprint, he built the lovely tea room.

McDonald's tea room was listed in "Adventures in Good Eating" in 1937. Her reputation was made. She remained in the guide every year until publication was discontinued after Hine's death. As the popularity of the restaurant grew, so did requests for recipes. Finally, Virginia gave in and compiled a cookbook. It was published in 1949. In six months the book had gone into three printings. In 1950, it was named as a Book-of-the-Month Club Selection. This is from a newspaper article by Al Bohling of the Kansas City Star.

Virginia McDonald died in March 1969, in her beloved home, "Maple Shade," located just east of the tea room. For three years two businessmen, Raymond Wade and Roland Merrigan were in charge of the tea room. It was sold to Tom and Betty Cobb in 1973.

to be a part of the school property."

It is not known the year it was built, but the first school building of note was a two-frame building with a belfry on top which heralded the school day for three generations.

"A two-story brick building was erected in 1872, at a cost of \$12,500 without furniture. The structure was put up under contract, the latter being let June 15, 1871 to A.F. Ely for the sum of \$11,000. This included all but heating and the bell work. The contract for heating was let to Lester, Heron, Smith & Co., of Chicago, for \$800. They were the only bidders in that department. What the bell cost is not stated. There were four departments, high school, grammar, elementary and primary, under the direction of a Principal and three other teachers"

In 1938, new doors opened to the high school building erected just east of the "Old" building. A gymnasium with a stage offered a setting for all school presentations. The agriculture building was erected at the same time.

A new elementary school and a new High School have now been constructed in a new location in the south part of Gallatin. After the high school was completed in 1974, the City of Gallatin purchased the old buildings, and later sold them to Mr. Smith for his furniture store.

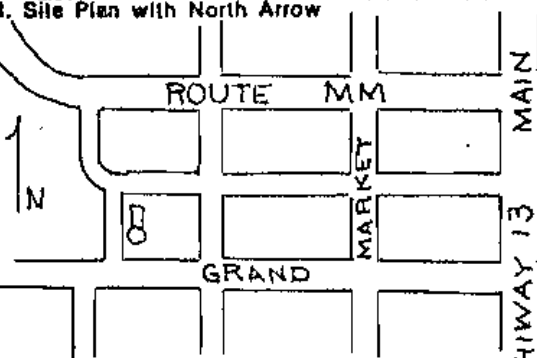

The Gallatin Rotary Club decided to give the old school bell a place of honor. On a beautiful autumn day in 1974, people crowded the area for several blocks around the 1910 building to watch an Air Force helicopter from Kansas City lift the old bell from its home to a safe place to await its final resting place. The Rotarians accepted the plan for a tower executed by Earl C. Binney. Ivan and Franklin Wilder constructed and erected the tower on the east side of the football field just south of the scoreboard. The bell was mounted in the tower where it rings out Gallatin's touchdowns for all to hear.

42. Further Description of Important Features This irregular shaped structure with an Italianate motif has a string course at the base and top of each window. The windows have radiating voussoir arches over them. The cornice has obviously been altered with the heavy brackets removed. The most prominent feature, apart from the rotary jail, is the large air ventilation vane on the top of the structure.		27. Other Surveys in Which Included neglect		
43. History and Significance The Daviess County rotary jail was constructed in 1887. The architectural firms of Eckel and Aldrich and Eckel and Mann were architects for this and the sheriff's residence. The idea of a circular jail was conceived by Jeremy Bentham, whose famous English panoptican prison was built in 1779. (see appendix)		37. Condition Interior _____ Exterior fair		5. Other Name(s)

Daviess County Jail
#43 Appendix

The idea of iron cells placed in the center of a room is impossible to trace. However, W.H. Brown of Indianapolis, Indiana received on July 12, 1881, a patent for a rotary jail. Brown's idea was that a jail could be made into something like a lazy susan. The center of the lazy susan was mounted on a rotating plate which formed pie-shaped cells. These were iron-barred and partitioned off with a doorway but no entrance. Bunks were placed along the partitions, with heat and toilet facilities in the center. The outer stationary iron-gridded cylinder contained a door which could be opened only by the jailer. Thus, to get the prisoners in or out, the inner cylinder was rotated to the position where the cell doorway matched the outer entrance.

The second floor contained traditional cells for women.

In 1920, Gallatin put in a new sewage system which caused the toilet facilities to be changed. The rotary cells remained in operation until the 1960's when the inner cage was cut into pieces and used in the remodeling of the jail. The jail is no longer in use.

Daviess County had at least two other jails before this one. Records show that \$400 was appropriated, and a contract was awarded to John A. Comer in May, 1838 for a jail and a year was allowed in which to erect the building. It required a longer period of time, and the building was ready for occupancy in March 1841.

Kost's History of Daviess County describes it as follows: "It stood on the next block north of the public square in Gallatin and was made of hewn timber one foot square and notched down so as to fit close. It was double, on one pin within another, with four inches of space between them. This space was filled with straight poles dropped down from the top. The bottom of the floor was also double, like the sides. The inner space of the building was 20 feet square and the height of the ceiling was also 20 feet. The only entrance was through a trap door in the center of the ceiling."

The total cost of this prison was \$560. In April 1857, the court appropriated \$4,000 to build a stone jail in the northwest corner of the public square. The building was completed November 15, 1858, and cost \$7,850. In June 1859, a kitchen and smokehouse was added at a cost of \$579. This jail burned later the general opinion being that it was set on fire.

42. Further Description of Important Features
This eclectic style courthouse has some Greek motif to the style. The entrance doorways on all four sides are covered by a Romansque arch with a broken pediment. This is topped by tall columns which end in ionic capitals. There are dentils under the eaves. There is a tower on the roof which is covered with a dome shaped roof. There are clocks on all four sides of the dome. The open louvered shutters in the side walls allow the hourly bell (see appendix)

43. History and Significance
In 1843, a \$6,000 courthouse was completed, according to a later newspaper report. It was square, probably 40' x 40', although no record exists which gives its exact dimensions. There were 2 double door openings, one each on the west and south. The rostrum was on the north side built high so the feet of those on it were above the eye level (see appendix)

of the seated spectators. It was furnished with wooden benches. There were 4 rooms upstairs.

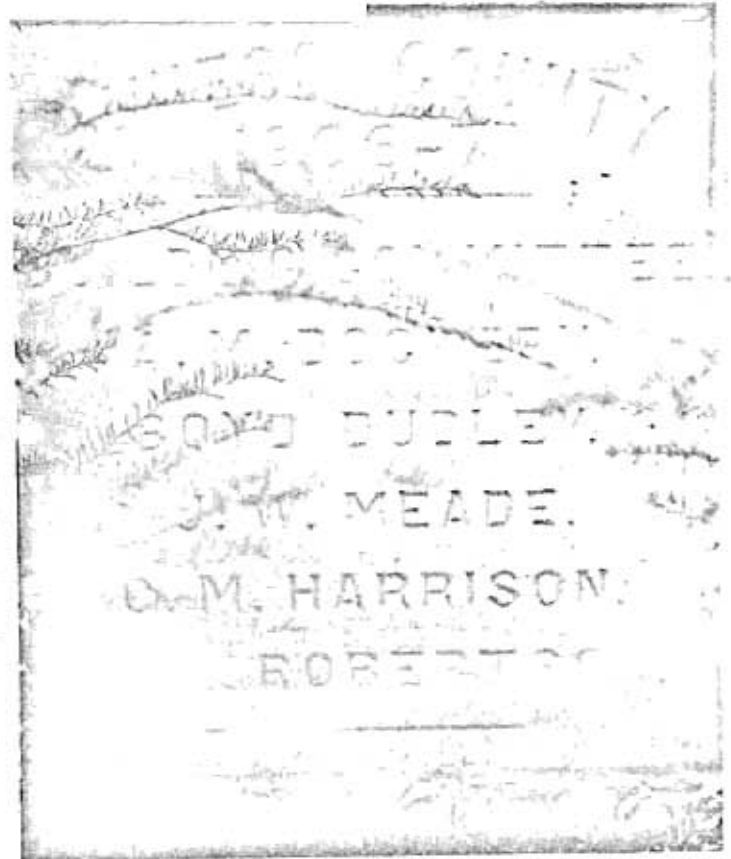

A single story, two room structure was built about 1858, just east of the Courthouse, and in it the Circuit Clerk and recorder, (one person) had offices. There were no vaults and the records were kept in desks.

As early as 1865, people were complaining of the condition of the Courthouse. Several propositions to vote bonds for a new one were rejected in 1889. Finally, the proposition to build a \$75,000 Courthouse was passed in 1905. The cornerstone was laid on May 24, 1907, the Masonic Lodge having charge of the ceremony. On Monday, August 31, 1908, the Court formally accepted the building and final payment was made to the Louisville Company.

Laying Courthouse Cornerstone

Gallatin North Missourian
July 19, 1973

The yesteryear photograph at left, from the collection of Selden B. Stout, of Maumee, Ohio, shows the cornerstone laying ceremony for the Daviess County courthouse in Gallatin. The white-haired gent next to the cornerstone is Gallatin's No. 1 citizen of that era, the late Gov. A. M. Dockery, who was chairman of the building committee. Other members of the committee were Boyd Dudley, attorney-at-law, J. W. Meade, banker, W. L. Robertson, editor of the Gallatin Democrat and C. M. Harrison, editor of the North Missourian. On the other side of the cornerstone, which faces east in Gallatin, were the names of the distinguished county court. The county judges in 1906 were R. McGahey, Wm. J. Gromer, and Dan'l Blackburn. In 1907 the judges were G. A. McWilliams, Wm. J. Gromer and J. P. Tarwater. The courthouse was dedicated in 1908. The cornerstone today peeks out from behind courthouse greenery.

Connell Hardware used all that building. Today the building is the home of Intercounty Telephone Company and the Hale Grocery.

A Barber Pole, No Less

Storefronts along the east side of the square in the circa 1915 photograph (upper) show a preponderance of awnings, missing from the scene today (below). In those days the postoffice occupied the corner building, with the WOW lodge half upstairs. Hales Super Market today takes up the space then occupied by a hardware store, a grocery store and barber shop. Today's scene reveals the improvement of store fronts, also the presence of TV antennae.

Gallatin City Hall
#43 Appendix

support to the yearly budget the building was sold to the city and is now the city hall, which houses the fire and police department.

The meeting to organize the Y.M.C.A. was held in the Methodist church, January 16, 1887. In 1908, the urgent need of a permanent building was felt. Through the donation of a lot by C.L. Knaur, and money raised by popular subscription the building one block east of the square, was erected at a cost of about \$8,000. The new building was completed in January 1909, (the Masons were in charge of the Cornerstone ceremony on October 5, 1908). The building contained a combination gymnasium-auditorium, kitchen and dining room facilities, a main room and a second floor for a library. At the rear of the building is a tennis court. The first full-time secretary was Fred Vollmer.

While the local Y.M.C.A. is an institution of the past, it filled a commendable and worthy page in the history of Gallatin and Daviess County.

First Christian Church

#43 Appendix

was reorganized in 1865 with 23 members.

In 1866, a large frame church costing some \$4,000 was erected across the street and a little north of the present church. In 1898, the present church was erected. A large basement was added in 1921 and an educational building in 1963. John Kirdendoll was the builder. In 1921, the total membership of the church was 512, with a Bible School enrollment of 450. The young married class met in the theater for Sunday School because of large attendance and inadequate space in the church.

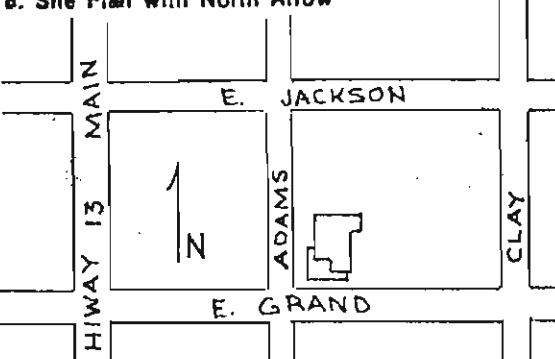

The bazaar and chicken dinners have always been big days. The ladies raised their own chickens and would usually prepare two with the trimmings, bake a pie and maybe take some potatoes. Much of the food was raised and canned that was furnished for the dinner, the pumpkin for pies, the cream and the butter, the canned green beans and corn.

The lowest price remembered for the meal was 30¢. It was later raised to 50¢. The women would cream the left-over chicken, make biscuits and serve the left-overs for supper for 35¢. They would work until 10 or 11 p.m. cleaning up the kitchen. There was quite a discussion when the price was raised to 75¢, and many thought the price was too high when it was raised to \$1.00.

42. Further Description of important Features
This house lost much of the detail when the remodeling covered the window lintels and original clapboard. There is an iron cresting along the peak of the roof. An eyebrow roof is noticed at the attic level in the west and south gable ends. There are stained glassed sections in the double wide window on the south and 2/2 windows in the second story windows at the north end. (see appendix)

43. History and Significance
Part of this house is among the oldest in Gallatin. The original house was remodeled in or about 1906 making it about twice the size it was originally. Porches were removed within the last 10 years. Hand hewn boards in the basement are still in evidence of the age of this house. (see appendix)

#42 Appendix

The garage on the north side of the home is an addition. There appears to be a fireplace in the west wing of the house.

#43 Appendix

Honorable Joshua W. Alexander, Attorney at Gallatin, was a distinctive public servant for his community and for the state during a period of 46 years. Admitted to the bar in 1875, he began practicing in Gallatin and the next year was elected public administrator of the county.

He served on the Gallatin Board of Education and as mayor. The former was a period of twenty-one years.

In 1882, he was elected to the office of Representative of Daviess County and served in the Missouri General Assembly during some eventful years.

He was chairman of the Committee on Appropriations and was the leader in the enactment of legislation enforcing the provisions of the Constitution of 1875 to correct abuses and prevent unjust discrimination and extortion in the rates of freight and passenger tariffs.

He was elected Judge of the 7th Judicial circuit and later resigned to accept the position as representative to Congress from the Third Congressional District, a position for which he had not been a candidate. He accepted this position, however, served well and was chairman of many important committees and introduced much helpful legislation.

On December 15, 1919, Judge Alexander's loyal, arduous, and able service to the country was rewarded by his appointment to a seat in the cabinet of President Wilson, as Secretary of Commerce.

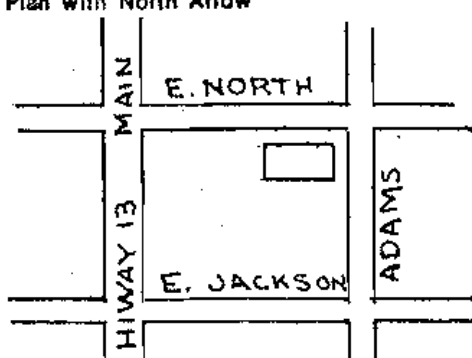

In the annuals of Missouri, the name of Judge Alexander will live as representing the finest, highest type of citizen the state has produced.

A detailed account of Judge Alexander's accomplishments can be found in Daviess-Gentry County History by Leopard & Buel.

Dockery Park
#43 Appendix

City Park which bears his name in 1906. Originally the park contained only 14 acres, but 6 additional acres have been added to it. The park is maintained by a 2 mill tax at present.

Governor Dockery served as president of the park board for many years and was instrumental in making the park a valuable asset to the city. Accounts of Governor Dockery are in all history books regarding his contributions to the county. He was born in Daviess County. He began his career as a licensed physician, but spent most of his life in public service in district, state and national affairs. For 16 years he represented the Third Dist. in Congress, and during the administration of President Wilson held the post of the Third Assistant Postmaster General. He served as Governor of Missouri 1901-1905.

The late W.Glen Smith, age 96, recalled this about Governor Dockery:

"In his declining years he became a self-appointed overseer for Union Township. He traveled the highways and by-ways in his road wagon drawn by an old gray mare always seeking chuck holes and culverts that were in need of repair. His work force consisted of one negro gentleman by the name of Mose Miles and his equipment consisted of a pick and shovel which did not show too much wear. But he filled the chuck holes by the efforts of Mose while he sat in the buggy holding an umbrella."

The first high school year book, "The Gallamo", was dedicated to this man. He founded the Gallatin High School library, served on the Board of Education, provided scholarships, gave other prizes, and provided all school children a free show on his birthday.

"To give one's self is better than one's alms,
He gave himself-beyond the gift of gold."

The Gallatin Chautauqua was an annual event of much interest and importance. It was held in August of each year at Dockery Park, and it drew vast crowds for many miles around. A large tent was provided for the crowds while they listened to many varieties of entertainment from traveling troupes of entertainers. The Chautauqua, so named because this type of entertainment originated in Chautauqua, New York, was an arrangement whereby a professional entertainment company supplied three to nine day programs, which included morning, afternoon and evening concerts, plays and lectures.

(See next page)

Dockery Park
#43 Appendix Cont.

Attractions remembered at Gallatin included Robert Wassman, eminent wizard of the world's master magicians; Dr. Burriss Jenkins, noted author, lecturer and educator; Fatty Arbuckle's best films. There were acrobatic acts and musical presentations, animal acts and gifted soloists. Many of the people who appeared in Gallatin became celebrities of national or international fame.

Residents purchased season tickets and brought tents to the park along with furniture for light housekeeping, and enjoyed the nine day event. Lumber for the tent floor could be rented from the local lumber yard, if desired. A stock tank provided drinking water by using one of the tin cups wired to the tank rim, but soft drinks could be purchased along with peanuts and other delicacies. Local residents often had to walk back to their permanent homes to see to the morning chores such as feeding chickens and milking the cows. Stone offices provided shelter for the ticket sellers at both entrances to the park, but they are no longer visible.

She was also a sister.

The Brandoms, present owners have the original blue print for the house. There were two homes built by this same plan. The other one, known as the Wood Hamilton house is located at 214 S. Daviess. The tower has been removed from this house.

The Brandoms added a three car garage, and a family room to the house and did extensive remodeling on the interior. The outside is basically the same with the exception of the addition on the east and west.

The original house had a water tank on the third floor which supplied water for the bathroom through lead pipes. The water was pumped from wells on the property. The tank was constructed of two by fours and lined with lead. The lumber used in the house was of excellent quality. The ceiling joist are 2 x 12 in the first story; 2 x 10 in the second and 2 x 8 in the third story.

Heat was supplied by a base burner in the parlor, the kitchen stove and stove pipers through the floor helped to heat the bedrooms.

more accessible, enhance its facilities, its removal to another location was desirable. Gallatin was selected. The citizens agreed to furnish the College site and erect a building, to cost not less than \$15,000 and within two years, to further support it with funds. Five acres, known as the James Bolin tract adjoining the city on the south was the site secured for the college.

The college had seven departments and degrees were granted in "Bachelor of Science," "Bachelor of Arts," and "Master of Arts". Around 1900 an addition was added to the east end of the original building which housed the president and his family, and also the women students. At a later date a men's dormitory was built across the street west of the main building.

Later it became Grand River Academy when William Jewell College agreed to pay off the mortgage and provide an endowment for the institution. In 1909, a \$6,000 dormitory was erected, but the academy closed in 1910. The school opened again in 1914, as a school for girls and a full four-year course was offered. During the fall of 1918, an attempt was made to make Grand River College an accredited Military School for the Army Training Corps. Before the petition was acted upon by the government, the college burned.

42. Further Description of Important Features
Typical of Roman Classicism this church follows the typical one-story Roman temple form employing variations of the Roman orders. The raised first floor is characteristic of design inspired by the proper Roman temple built on a platform or podium. The four-columned portico with pediment encloses a lunette. The classical moldings on this structure are left plain without enrichment and are painted white.

43. History and Significance
The Gallatin United Methodist Church was organized in 1832. In 1859, a frame church was erected at a cost of about \$1500. This building was replaced in 1886 by another frame structure at a cost of \$3500. The present building was dedicated in 1913 and valued at \$35,000. (see appendix)

42. Further Description of Important Features
This home has an ornate porch area with carpenter-turned spindles. The tower has round windows with patterned shingles. The square floor plan allows for seven fireplaces. A wide oak staircase, hardwood floors and hot water heat are found in the house. There are stained glass windows throughout the house.

43. History and Significance
Mr. and Mrs. A.T. Ray devoted a large portion of their time and energy to further the work of the First Baptist Church in Gallatin. Mrs. Ray worked for years as a teacher and dept. head of the primary or young children's group. Mr. Ray was a trustee, deacon, Sunday School Supt. and a teacher in the church. They gave generously to the church and to other Baptist projects. (see appendix)

#43 Appendix

They gave regularly to William Jewell College and as a result of their generosity, many young people, who could not have done so otherwise, were able to receive an education. Although they had no children of their own, they were interested in and loved young people. It was not unusual for them to take some unkempt, poorly-clothed child from the street into their home, give him or her a bath and then go to town and buy a wardrobe for the child.

The Rays gave a pipe organ to the Baptist Church, among other things, and they left an endowment fund which is used still for purchase of things for the church. The Rays took Mrs. Ray's brother, Fred Weiser, and a niece, Helen Weiser, into their home after Helen's mother died when Helen was a young child. They raised her as if she had been their own child. After their deaths, the niece and her husband, Floyd Tuggle, lived in the house until approximately 1950.

Floyd Tuggle farmed extensively for over 60 years, improving his land and pioneering many conservation practices. He was instrumental in getting the extension program in the county and in 1920, he helped organize the drainage district. He helped organize the Daviess County Soil District and was on the Board of Supervisors for years.

He was also associated with the First National Bank for over 60 years, serving as president and chairman of the board. He served four terms in the state legislature and was active in many community activities, serving on the school board for 12 years. He served on other boards also, including Lake Viking board and he was an active Rotarian for over 30 years. Both Mr. & Mrs. Tuggle followed in the Ray's footsteps in the Baptist Church where they served faithfully in many capacities.

under the name of Cline & Cline until the death of Peter P. Cline in 1913. They started with a buhr mill and for six years used three runs of buhrs. Then they put in rolls and in 1913, the mill was equipped with three double rolls, two Buckleys, and one corn mill. During World War I, the company had a contract with the government and the mill was conducted as a part of a government operation.

The trade marks of the mill products were "Sunbeam" (soft) and "Old Dutch" (hard) wheat.

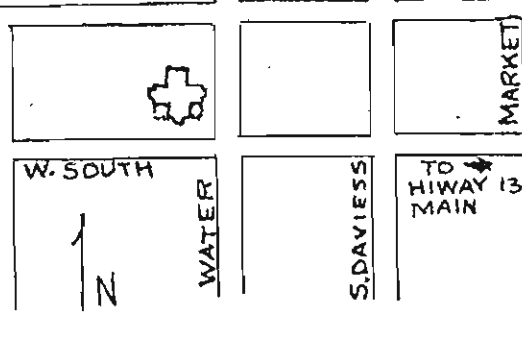

The first mill building was brick but it was destroyed by fire. The second building was frame but it too was destroyed by fire. Mr. Glen Smith recalled the fire that destroyed the mill.

"In this fire the engine room being slightly apart from the main building was not destroyed, and the superb Corliss Steam Engine and Boiler was not damaged so that when the new mill was built the old engine furnished the power. This engine and boiler was operated by William Manuel in both the old and new buildings. The boiler was equipped with a very resonant steam whistle which Bill would sound at promptly 7 a.m., noon and 5:45 p.m. Many times I have seen Bill stand with his pocket watch in hand, and the whistle cord in the other and promptly on the second he would give a long blast which could be easily heard many miles in the country and served to warn the farmers that it was dinner time or time to 'turn out.'"

Lile Cemetery
#43 Appendix

Savings Association was one of the old settlers of the county, stood high as an honorable man and citizen, and had, in numerous instances, served the people faithfully and well in an official capacity. He had been sheriff of the county two terms, circuit clerk for six years, recorder for four years, and also county commissioner.

The day of the murder, between twelve and one o'clock, on Tuesday, December 7, two men entered the office of the Savings Assoc. and one asked Captain Sheets if he could change a \$100 bill, and the other spoke and said if he had paper and ink he would write a receipt for the money paid him. The impression they wished to convey to Sheets was, that they had stepped in the bank for that purpose, that one man owed the other and wanted change to pay him.

Mr. McDowell, who was also in the bank, furnished the man with paper and pencil. Cashier Sheets said he could change the bill, and went into the back room, where the safe was kept, to get the money. The sudden flash report of a pistol caused McDowell to turn his head and he saw the first man standing in the doorway with pistol in hand and Sheets with hands over his breast. McDowell managed to escape the bullet intended for him, and gave the alarm.

The robbers lost no time in securing what funds were handy, and managed to escape on horseback, actually both rode away on one horse. Men, as soon as possible armed themselves and started in active pursuit. It was, however fruitless, and to this day it is not positively known who was the murderer of John W. Sheets and who robbed the Daviess County Savings Association.

The boldness of the crime, suggested that the "James Boys" might have been the perpetrators of this deed. The horse that had been left behind was traced as the property of Jesse James, but even so the crime could never be actually traced to him.

'UNCLE WES' ROBERTSON

By Joe Snyder
Publisher, Gallatin (Mo.) North Missourian

Few editors in Missouri history have been more colorful, and none paid a greater price for his efforts to preserve the people's right to know, than Wesley L. Robertson of Gallatin. The fiery editor and co-publisher of the Democrat was shot and killed at his desk because of stories he had written for his newspaper.

"Uncle Wes," as he was affectionately known in his hometown, died from bullet wounds inflicted by a former city official. Slugs from a .32 caliber pistol ended the career of one of Missouri's most widely known and beloved country editors and a powerful voice in the state's political wars of that era.

Robertson died Dec. 23, 1919, in the climax of a feud with Hugh Tarwater, former city marshal, which had been going on for over four years. Townspeople who had followed the antagonism through Uncle Wes's accurate but caustic pen, knew of the intense feeling between the two but none dreamed the conclusion would prove so tragic.

Tarwater, at the time of the shooting, had a \$20,000 libel suit against Uncle Wes and the Democrat. This action greatly incensed the rotund publisher who felt his newspaper was the innocent victim of circumstance and, indeed, a check of the period indicate his feeling may have been fully justified.

The news story which brought about the libel action was reprinted following the filing of the suit, plus some pertinent comment by the editor:

"Informations charging Hugh Tarwater with being intoxicated and using abusive language were filed with Judge John W. Everman the first of the week. Under protest Mr. Tarwater pleaded guilty to the former charge and

was fined \$20 and costs, no favor being asked or clemency extended by reason of Mr. Tarwater being official court clerk. The second charge will come up for hearing later. We understand Mr. Tarwater claims the charges were the result of his activity in helping round up gamblers and bootleggers."

Uncle Wes commented: "No denial of the facts of this information and the warrant was ever issued. Judge Everman, both publicly and in an affidavit, stated he served them and assessed a fine on a plea of guilty. He states that he left the papers with Tarwater with instructions to him, as clerk of the court, to complete the records in the case. Mr. Tarwater, however, in his deposition, denies that he pled guilty.

"So," the editor concluded in his editorial, "there remains a question of veracity between these two officials with the Democrat apparently made the goat and demanded to pay \$20,000. And we believe we are only expressing our right and, in fact, our duty, to let our readers know the facts.

"Tarwater, for the past several years, has made threats to put another paper in town to injure the Democrat. But these threats have had no effect in altering the opinion of the publishers that they have the right to direct its policies without dictation of intimidation."

Other, and vocal, comments by the editor had irritated Tarwater. Those were the days of the Chautauqua in Gallatin and most other small towns. Uncle Wes was on the program committee that year and when one of the main speakers failed to show up, it became Uncle Wes's duty, or rather his opportunity, to get up and fill in with a few well-chosen words.

Picture if you can this portly, mustached bundle of delightful mischief (he was the town's official Santa Claus for many years before his death) getting up before a gay throng of farm folks in the county seat for a week end of fun and frolic, put his thumbs in his vest, and declare:

"If I had known I would be called upon to speak, I would have worn my \$20,000 suit."

The crowd appreciated this remark and roared with laughter. But Tarwater, who was in the crowd, stalked out red-faced and red-eyed. Some-time later, he entered the office of the Democrat and approached "Uncle Wes" who was writing at his desk.

Employees heard a heated exchange of words--then three shots. They rushed to the front office to find the editor dying on the floor with three wounds. They held the marshall until the sheriff arrived.

"Uncle Wes" was tenderly moved to his home a few blocks away and at that time gave a dying statement to L.B. Gillihan, the prosecuting attorney.

Uncle Wes stated, in labored gasps, that "Tarwater told me . . . not to publish . . . or utter . . . his name . . . again. I told him . . . I would run . . . the paper to suit . . . myself. He . . . repeated his . . . demands . . . and then fired."

The tragedy cast gloom over the community. Fred Harrison wrote in the death story the next week, carried in both the Democrat and North Missourian, that "for all concerned, it is one of the mostly deeply regretted affairs in the community's history."

Robertson's partner, Ball, was deeply grieved by the incident and was in shock several days. The misfortune to his senior partner, whom he greatly respected and admired, took all the zest of newspapering in Gallatin out of him and he soon sold the paper and moved to Colorado where the Ball name later became prominent in publishing circles.

The feeling towards Tarwater became so pronounced that he was moved to a St. Joseph jail for safekeeping. He maintained all along that he fired in self-defense and said, " I did not intend to shoot anybody."

This was the theme of his defense at the trial along with temporary insanity and it saved him from the gallows.

Funeral services for Uncle Wes attracted a great throng of friends and dignitaries from all over the state. Over 100 newspapers, both large and small, commented editorially on his untimely death and the contributions he had made to the profession and his fellowmen.

An interesting sidelight to the episode is that Louis Nelson Bowman, editor and publisher of the Tri-County News at King City, then a capable but fledgling reporter for the St. Joseph Gazette, scored a noteworthy inside story on the trial.

It happened quite by accident when he struck up a conversation with Atch A. Blair, Republican sheriff of Daviess county, while the two were on a Rock Island train headed for Gallatin from St. Joseph.

Sheriff Blair had no idea to whom he was so freely discussing the case so, as Louie wrote in his fine story, the sheriff declared that, "One: I hate all Democrats; two: Tarwater done the state and the party a great service by killing the fire-eating Democratic editor."

Then Bowman added his own comment to the effect that, "one, The sheriff had no idea I was a reporter and, two: He talked too much anyway."

Bowman's story helped convict Tarwater of first degree murder. He was sentenced to 35 years but died in the prison hospital at Jefferson City long before his term would have expired.

Old Scotland Church of Christ

#43 Appendix

Sunday Church services were held in the homes, with 14 charter members, then in 1863 they built a public building on the 3 acres where the cemetery was. Because of so many "Scotts" living in the community the church and cemetery name was changed to "Scotland." In 1902, for \$1,000.00 the present building was constructed by the church members. The walnut communion table and 35 long bench seats were hand carved by Nathan Reed over 100 years ago and are still used today. Twelve members attending services now are direct descendents of a charter member. There is an average attendance of 30 every Sunday morning. This is the only country church in Daviess County which has had Sunday Church services at the same location for 115 years.
