15. Name of Established District

2. Further Description of Important Features
Large piers support this double-deck reinforced concrete viaduct structure. The upper level is a divided four-lane thoroughfare. It extends from Summit to Liberty Streets at a 5 1/2% grade. The lower level thoroughfare extends from Mulberry to branch roadways lower down on the bluff. The highest point of the viaduct extends 118 feet. The length of the upper deck is 2278 feet.

3. History and Significance
A steel viaduct for cable cars was constructed in 1887 in order to provide an improved means of transportation between the downtown area and the Central Industrial District. It was replaced in 1915 by this viaduct of reinforced concrete. In 1965 the viaduct was completely restored and the upper deck of the double deck structure became a four-lane thoroughfare.

4. Description of Environment and Outbuildings
Commercial structures are to the north and south of the western half of the viaduct. The eastern half of the viaduct spans numerous railroad tracks before terminating at the top of the bluff on Summit Street.

15. Name of Established District

42. Further Description of Important Features
An elevated loading dock is located along the front facade. Three rectangular sash windows are located in each bay. The sills of the third floor windows project. Terra cotta ornaments are located at the corners of the window groupings, and beneath the cornice.

43. History and Significance
The K.C. Wholesale Grocery was organized in 1902. In 1912, as business increased, they purchased the building at this location that was occupied by the Kingman-Moore Implement Co. The present building was erected by the company in 1913/14. Spices were made on the fifth floor. All of the coffees handled by the firm were roasted, blended and ground on the seventh floor.

44. Description of Environment and Outbuildings
This building is located in Kansas City's Central Industrial District. A commercial building is to the west. To the east, railroad tracks separate it from the next commercial building. To the north are railroad tracks and commercial buildings.

40. Visible from Public Road? Yes No

15. Name of Established District

41. Distance from and Frontage on Road
 11' from; 48' on road.

12. Further Description of Important Features
 This building is on a corner. The center arched entrance and the windows to each side have been closed in with glass blocks. The entrance arch is repeated on the third and fourth floors. The center bay projects slightly. The windows on the side of the building have also been altered with glass blocks.

13. History and Significance Thomas H. Swope was one of Kansas City's greatest benefactors. He came to Kansas City in 1857, invested heavily in business property and became the largest land owner in the city. He had this building erected in 1887/88. A number of agricultural implement dealers were located in this building including the Grand DeTour Plow Co.; Acme Harvester Co.; and the Pekin Plow Co.

14. Description of Environment and Outbuildings
 This building is located in Kansas City's Central Industrial District. To the north, east and west are commercial buildings. To the south is the Twelfth Street Viaduct.

42. Further Description of Important Features

This building features a recessed entrance arch with a small oriel window immediately above. On each side of the entrance are arched windows continuing through the second floor. The windows of the second, third and fourth floor are rectangular. Brick quoins distinguish the sides of the structure. Corbelled brick work is noted along the cornice.

43. History and Significance

This building housed dealers in agricultural implements, as did most of the buildings in this area. Early tenants were the implement firms of W.D. Fullerton, and Rhodes and Barkly.

44. Description of Environment and Outbuildings

This building is located in Kansas City's Central Industrial District. Commercial buildings are located to the north, east and west. The Twelfth Street Viaduct is located to the south.

42. Further Description of Important Features
The long facade features a recessed entrance in the third bay from the right. The entrance is approached by a flight of steps. The outstanding feature of this building is the complex molded brick and panel brick work. Round molded brick is used along the sides of the windows. Ornate corbelling forms the cornice. A date inscription is found beneath the cornice.

43. History and Significance
The Standard Implement Company was established in Illinois in 1852. In 1882 the company was incorporated by several Illinois firms, including the Newton Wagon Co. and the Grand Detour Plow Co. Andrew G. Bodwell started an agricultural implement business on the levee in 1872. He later became President of the Grand Detour Plow Co. (continued):

44. Description of Environment and Outbuildings
This building is located in Kansas City's Central Industrial District. To the east, west and north are commercial buildings. To the south is the Twelfth Street viaduct.

42. Further Description of Important Features

The center entrance is recessed. The windows on each side are covered with wooden slats. The windows of the second and third floors are rectangular. The windows of the fourth floor are set within a relieving arch. In the arched segment is a metal design featuring a wheel motif. The roof line appears to have been altered. Some rear windows have been bricked in. A loading dock is located on the Hickory Street side.

43. History and Significance

In 1872 James English was associated with the agricultural implement firm of English and Dixon. By 1881 he and his brothers, Charles and Thomas, had formed the English Brothers Machinery Co., dealing in belting, pump and hydraulic machinery, and hardware specialties. (continued):

44. Description of Environment and Outbuildings

This building is located in Kansas City's Central Industrial District. Commercial buildings are located to the north, east, and west. To the south is the Twelfth Street Viaduct.

42. Further Description of Important Features
This corner building has the main entrance facing south, offset to the left. The second, third and fourth floors are united by brick piers, surmounted by a curved arch. The arch forms Diocletian windows on the fourth floor. Corbelling distinguishes the spandrels between the three arches. The fifth floor is marked by three narrow arched windows in each bay. Some windows on the east side of the building have been bricked in. A decorative cornice has been removed.

43. History and Significance
Charles Campbell, an Illinois native, came to Kansas City in 1879 and established the Campbell Glass and Paint Co. By 1913 the firm had branches in five southwest cities. Campbell served on the Park Board and was president of the 1900 Convention Hall Building Company. In addition to their paint products, the company also crafted stained and jeweled glass windows.

44. Description of Environment and Outbuildings
This building is located in Kansas City's Central Industrial District. Commercial buildings are located to the east and west. To the south is the Twelfth Street viaduct. To the north are railroad tracks and vacant land.

42. Further Description of Important Features
The entrance to this building is offset right. The middle and left bays of the first floor consist of garage doors. The arched windows of the second, third & fourth floors have been filled in with glass blocks. The fourth floor features three narrow arched windows in each bay. A loading dock is located in the rear of the building.

43. History and Significance
Albert Marty, a real estate investor, had this building constructed. Several firms were located here. One of the earliest tenants was the Creamery Package Manufacturing Company, a firm that dealt in dairy, creamery, and cheese factory supplies. Later tenants included the Union Transfer Company, the Esterly Harvesting Machine Company, and Hanna, Lea and Co., corn merchants.

44. Description of Environment and Outbuildings
This building is located in Kansas City's Central Industrial District. Commercial buildings are to the east and west. The Twelfth Street Viaduct is to the south. To the north are railroad tracks and commercial buildings.

J.I. Case Threshing Machine Company

43. (continued from Page 1.)
the Stowe Implement Supply Co. The founder, Col. James G. Stowe,
was formerly head of the Whitman and Barnes Manufacturing Co.
Later the building was occupied by the J.I. Case Threshing
Machine Company.

42. (continued from Page 1.)
are Diocletian. The fifth floor features four narrow rectangular
windows per bay. A corbelled cornice completes the structure.
A newer concrete block and brick garage extends from the northwest
corner of the building.
