City building permit #H1322, 6/26/1974. Schwarz, Henmi & Zobel, architects; John C. Theiss, Jr., engineer; contractor "to come later."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The "Hilton St. Louis at the Ballpark," as named in 1979, was constructed as separate components. It has a steel structure with a two story square base and a multi-story tower encompassing approximately a quarter of the overall footprint (one city block). Both the tower and the base feature flat roofs, concrete cladding and historic windows. The two story "Spanish Pavilion" base by Javier Carvajal was originally built at the 1964-65 New York World's Fair. After the Spanish government donated the building it was moved and reconstructed in St. Louis in 1966. In 1976 Breckenridge Hotels acquired the building and constructed the hotel tower. Marriot Hotels purchased the property in 1979 and promptly constructed the second, triangular tower located at the edge of the plot. The second tower has projecting, angular bays. Recent additions and remodeling have occurred to the two story portion altering the original pavilion's exterior design.

City Building Permit #E5685, 8/12/1969. HOK; George Kassabaum, architect; Fruin-Colnon, builder.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Equitable Building office tower, designed by Hellmuth, Obata and Kassabaum, is two attached buildings; one being two stories of concrete and glass with large concrete pilasters and the other being a multi-story tower with steel framing and a reflective glass curtain wall. The tower has a concrete foundation at its base to match the attached two story building, with large pilasters aligning at the two story height. The glass curtain wall extends from this height upwards to the full height of tower. Overall the two buildings combined form a rectangular footprint and both sections have flat roofs and two bays of slender vertical windows in the base portion of the building.

City of St Louis Building permit C9404, 3/2/1967: "Boilermakers Lodge Local 27 Redevelopment Corp, owner at 721 Olive; a 2-story brick office and meeting hall 125x60."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Brewer Machine & Gear Co. office building is adjacent to a one-story warehouse that is owned by the firm. It is a one-story building with concrete block, brick and stone cladding. The brick on the south half of the building is punctuated with vertical concrete pilasters painted orange, and the entry to the "Social House" is faced with rubble stone. Small rectangular windows are separated by pilasters and feature concrete above and below from foundation to the wide flat concrete entablature. The north half of the building has the same window/pilaster formation (painted white) and a recessed glazed entry. Projecting north from this entry is a portico supported by square brick columns. The north façade is exposed concrete block construction. Separating the two parts is a brick wall with the Brewer Machine & Gear Co. signage framed with concrete.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

The Globe Drug Store was constructed on the corner of S. Broadway and Geyer Streets in 1963 in the Koskiusko District, an Urban Renewal District south of downtown. Koskiusko was targeted for new industrial and commercial development in the early 1950s and the project was initiated in 1960.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

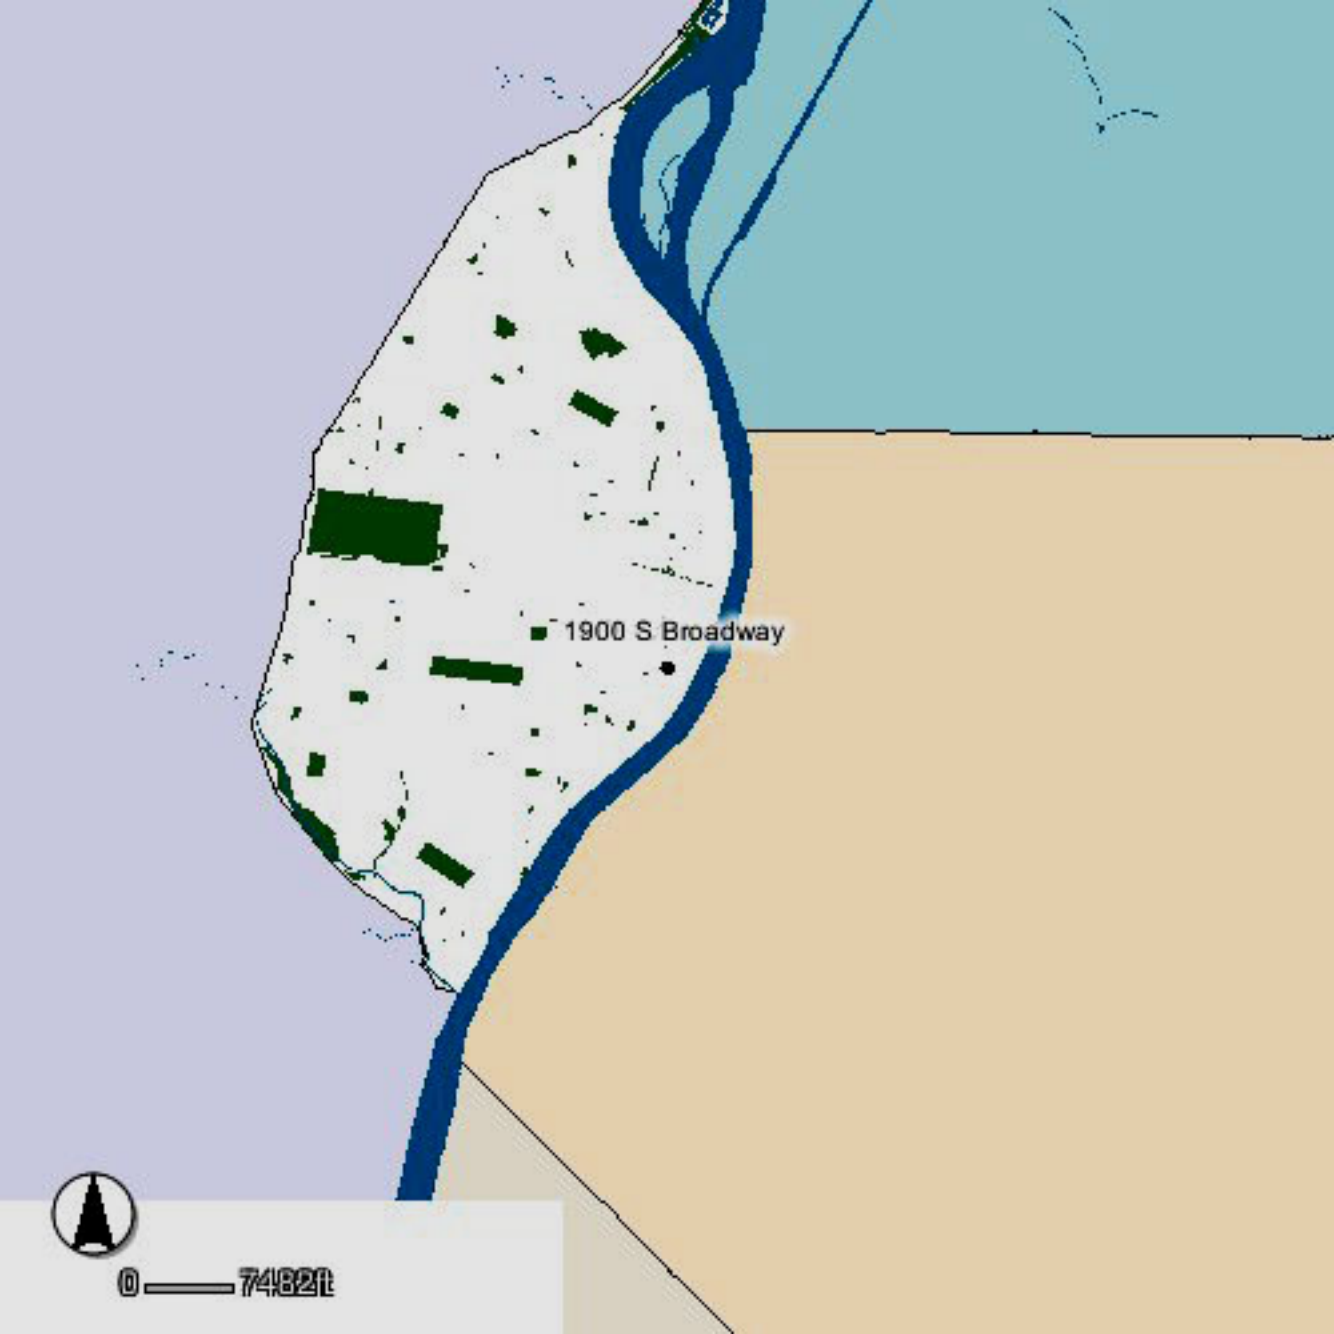

City of St Louis building permit A4778, 12/19/1962: "Drug Store, R&G Dev. Co. Inc, owner." Addition 1966.

Also Lashly, Paul W., "Urban Redevelopment" (Published as St Louis COMMERCE, official publication of the Chamber of Commerce of Metropolitan St Louis, April 15, 1953).

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Globe Drugs building is a rectangular single story corner building with a corner entry. The Broadway façade features a mainly glass storefront with a brick bulk head running beneath the glass and a projecting canopy which is curved at the street corner and terminates into the Geyer Ave façade. The corner entry is recessed slightly and features floor to ceiling windows as well as a transom window. The Geyer Ave façade is entirely brick with only a small portion of fenestration by the entry. Both the main facades also feature a short parapet and there is a small loading dock attached to the back of the building with a shed roof supported by a metal cage. There is a separate storefront at the south end of the Broadway façade.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

The Soulard Post Office was constructed in 1966 in the Koskiusko Area, which had been a crowded urban residential area until it was cleared in an Urban Redevelopment project starting in 1960. The Post Office is next to the Globe Drug Store. The USPS closed this location in 2012 and the property was offered for office space. It appears to be vacant as of 2013.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The United States Post Office Soulard Station Building is a small rectangular single-story brick building. The main entry features floor to ceiling curtain wall metal with a canopy wrapping around the corner. The main façade as well as the east façade feature vertical recesses containing a single vertical window with mosaic tiles both above and below the window.

Building permit G (?)6969, 7/25/1973, for a bank - maybe a later addition or alteration?

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The bank building is a rectangular single-story brick structure. An irregularly shaped zigzag canopy projects from the north façade. This line continues through the projecting brick wall forming a closed eave on the east façade above a bay of 5 floor-to-ceiling aluminum-framed windows. Under the canopy an aluminum storefront system with entry door has been boarded up. The canopy extends north and is supported by slim metal posts at the edge to accommodate the bank's drive-through. Past this canopy are boarded up square windows with brick sills under a closed eave.

City building permit #H111337, 9/16/1054. No architect or contractor listed.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Blewett School, by F. Ray Leimkuehler, is an irregularly shaped building with volumes of varying heights reaching three stories at its maximum. The main entry and stair has large concrete fluted pilasters extending from marble bases to a concrete cornice. The entry doors are recessed with double transom windows above which are vertical curtain wall with opaque spandrel panels. In some areas the roofline projects outwards creating a canopy supported by triangular concrete projections. Most windows are large bays of glass blocks on top of small square operable units with a concrete surround.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The former Crunden Branch Library is a single-story rectangular building, designed by Joseph Senne to serve the Pruitt-Igoe residents. It has a steel structure with stone facing. Its main façade features a central block containing the entry projecting above the roofline with a stone coping. Flanking this central block are two large bays of windows taking up much of the main façade. These windows are the only fenestration in the building. Two of the facades are faced with large square slate tiles while the remaining two are faced with red brick with a black granite base.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The St. Louis Fire Department building is an irregularly shaped building placed at an angle to the street grid, with various volumes and one or two stories, all with flat roofs. It has concrete foundations and a mixture of brick, concrete tile, and stone cladding. The main entry is a double height concrete framed cube with a recessed curtain wall. A large trapezoidal portico supported by open metal supports fronts Jefferson Avenue. The single-story sections of the building have brick-clad corners and a thick band of brick above a row of ribbon windows. Below the ribbon windows are gridded stone tiles which extend to the foundation. A single line of red painted sailor bond bricks wraps the entire building, aside from the entry.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

St Louis building permit D7131, 9/1/1967: "9-story masonry and glass office building for Ralston Purina Co." Architect listed as Gyo Obata; JS Alberici Construction, contractor.

Also in 1981 George McCue "The Building Art in St Louis: Two centuries."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Purina office building, part of the larger Checkerboard Square complex and designed by Gyo Obata Architects, is a rectangular reinforced concrete structure with concrete foundations and cladding, and a flat roof. There are two vertical full-height projections, one at each end of the building. The façade of the bottom three levels flares to create a triangular entry. The glass on these levels also follows this angle and only at the 4th floor does the wall become perpendicular to the ground. The ribbon windows, separated into 5 bays, are recessed into the façade at every level and the building is crested with a concrete cornice.

ARCHITECTURAL/HISTORIC INVENTORY FORM

5401 CHIPPEWA ST

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

This Phillips 66 Gas Station is a version of a standard design used by the oil company after World War II that features a distinctive canopy shaped like a prow, providing a dynamic quality. The station form usually included an office with a glazed façade and two service bays to one side. This gas station is one of several of the distinctive Phillips 66 stations erected in St. Louis with the prow canopy. It is one of the most intact in the St. Louis metro area.

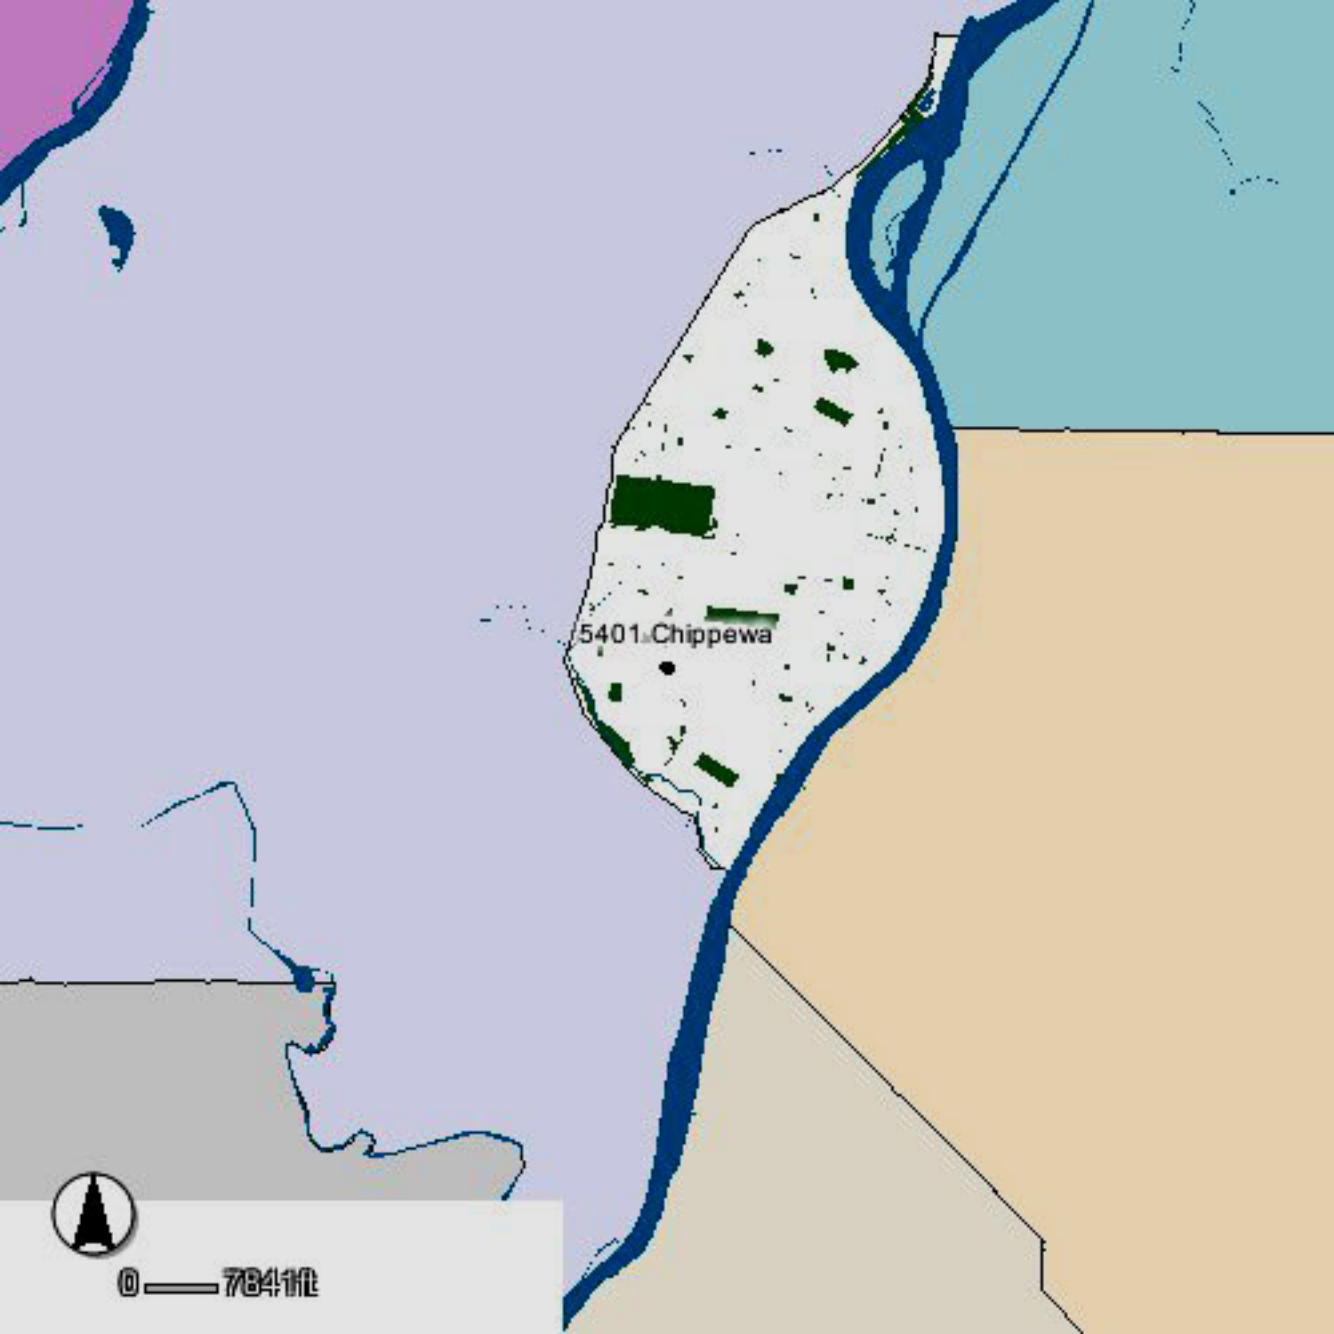

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

No building permits were found for this property.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The concrete block building has a rectangular in footprint except for the angled east side wall that continues the line of the angled prow. Vehicle doors provide access to the two service bays in the west portion of the building. Glazing rises above a low curb to ceiling height of the office on the façade and the front half of the east wall. The distinctive prow is entirely intact. A tripartite steel post with lattice work rises through a pierced front corner of the triangular canopy. Two secondary posts support the canopy, resting on a curb where presumably the gas pumps were located. The canopy is az steel frame enclosed with sheet metal.

City of St Louis building permit #A2613, 9/17/1962: "Bank for Public service savings & loan association, 50'x100'. Kenneth E. Wischmeyer, architect; Leslie Bergmeier, Engineer."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The PNC Bank building is a rectangular brick-clad three story building. It features three double-story grid sunshades at the primary façade, connected by a projecting cornice. The sunshades sit on a thick horizontal canopy above the ground floor, with three openings below it. The glass and aluminum-framed entry is the central opening, with large square shaped single pane windows on either side. The secondary façades have a rhythm of concrete-framed vertical slit windows ganged together by the frame on the second and third stories.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Eagle Bank and Trust building is a single-story building featuring an irregular plan with a flat roof, and concrete foundation. The building has concrete cladding, steel structural frame work, and glass curtain wall system. The Chippewa street façade features the steel framed curtain wall system, which wraps along the north façade. The building is surrounded by a parking lot on three facades, with a mid-rise projected concrete canopy drive-thru teller along the southern façade. A 7,000-sf addition was constructed at a later date.

St Louis building permit H3388, 10/30/1952: F.C. Schuster, architect; builder listed as C & B Const. Co. "1-story commercial."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Rosebrough Monument Company building is a single story building with a rectangular plan, flat roof and original windows. The main façade, and focal point of the building, is recessed. A projecting parapet is supported by four concrete angled pilasters with two 2-pane vertical windows flanking either side of the entry. The west façade features hand-painted signage along the roof line. The east façade features one ground to roof vertical pane window, with a vertical eight pane window. The façade, excluding the entry, alternates red and green washed brick.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The St. Raymond's Catholic Church is a rectangular building with concrete foundation, glass curtain wall, and a domed roof. This free standing building is part of a larger network of religious buildings on this parcel, with a brick courtyard wall for privacy. Set low to the ground, from both the street and parking lot facades the building has a minimal visual presence aside from the projection of the dome itself. The line of the flat roof and the ribbon windows directly above and below are the only other aspects of the building visible from outside the walls.

City of St Louis building permit 7/16/1963: "plant and office building 56C Redevelopment Corp. Allied Building Corp., contractor. Edward F Gordon, Architect, 8230 Forsyth, Clayton; plant and office 151 x 118 for Artcraft Lithographers Inc."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This irregularly shaped single-story office building and plant has a concrete foundation, running bond white brick cladding,and a flat roof. The two street facades feature floor to ceiling windows with aluminum framing in either single bays or banded. The Jefferson St façade steps back to accommodate the angled street and at the inside corner of each bay is a single window configuration. The main entry, also with floor to ceiling windows, is recessed a few feet to create a protected entry. There is a secondary entry to the north that features a cloth awning supported by two metal posts. Also on the north façade, the western half switches from brick cladding to concrete at the window sill line and the entire area is recessed slightly with a concrete frame. Metal coping extends around the entire building.

City of St Louis building permit #C6607, 1/19/1966: "1-story brick building American Optical; Albers Const. Co., B; A: John Crosby McEwen, N. Euclid; office building, 142 x 56; $100,000"

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a simple rectangular single-story brick building raised up on a concrete foundation. The main entry façade features a recessed entry with storefront system, a single casement window, and stacked bond brick cladding. Concrete steps lead to the door. The remaining facades are running bond brick and feature irregularly placed square casement windows as well as the occasional door.

City of St Louis building permit #B6378, 11/12/1964: "office and warehouse various sporting goods 39 Redevelopment Corp. Geo E. Quick, Jr. A, Clayton; office and warehouse for Wilson Sporting Goods, 19,970 sq ft; $150,000" Another building permit dated 5/18/1965 was for a Wilson Sporting Goods sign.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This office and warehouse building is a roughly square shaped single-story building with a slightly lower entry volume on the south. It features a concrete foundation and brick cladding. The main entry has aluminum framed vertical windows extending from foundation to roofline. Between these windows are bays of brickwork which project above roofline to create a broken parapet. The entry itself is an aluminum storefront system with projecting canopy above it. The main volume has the same brick patterns and very few windows with metal coping. A reaer projection houses the loading docks and features two loading doors as well as an access door.

This building is a rectangular double-height single-story building with concrete foundations and brick cladding. It has paved parking areas on all sides. It features a single story projection on the north façade that is the office and main entry to the building. The building has interesting brickwork with running bond bays separated by columns of stretchers with a slim reveal. Above and below each window are blue stacked bond bricks and the entire window bay is sandwiched between two rows of stretchers. The entry volume has further decorative and textural brickwork. The south and west facades feature ribbon windows with corrugated metal siding above.

This simple, single-story rectangular building has fields of blue brick along with painted concrete and concrete block. Its main façade features recessed bays of large regularly-spaced vertical rectangular windows. To either end are sections of blue running bond bricks. The east and west façades are concrete block with a taller base and small square windows. Concrete stairs lead up to the main entry on the north façade, and there is a small loading dock on the west façade.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This office and warehouse, single-story building is generally rectangular in fooprint, with a slightly shorter office volume at the south (front). This lower volume marks the entry, with an inset storefront wall under a curving canopy. The walls are a light orangey-pink brick. To the west of the recession are two horizontal bands of windows, but otherwise the building has very little fenestration. The the east of the recession the brick wall shields a vehicular area.

City of St Louis building permit 9/13/1963: "1-story brick building K & D Redevelopment Corp. Robert E. Lee, Pierce Bldg, A; B: L.A. Schaefer Constrion Co. testing lab; 141 x 90 $180,000" A later permit dated 11/12/1975 is for a "one-story masonry addition to the St Louis Testing Laboratory."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This single-story rectangular building has multi-pane windows set between brick panels. Overall it appears that the building is comprised of four smaller buildings connected to form one. An addition was completed in 1975. The Clark St. façade features vertical stacked bond bands of brick, interspersed with concrete block sections with either single or banded windows at the center. Midway down the façade the bricks change from red to a more polychrome mix, with a canopy over the west end of the north façade. The northwest façade has split-face concrete blocks while the southwest has brick once more. There is a small shed roofed projection on the east façade with large windows.

City of St Louis building permit 3/12/1963: "office and warehouse 37A Mill Creek Redevelopment Corp. Builder's architect: Hannon Construction Co., B 7247 Olive St. Road, Burton J. Lipman same address; 62 x 27 office 145 x 150 warehouse to be occupied by Weather Tite Co, $182,000"

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This industrial warehouse is a rectangular single-story building with a small office projection off the southeast corner. It has concrete foundations and brick cladding. The main portion of the building is comprised of concrete blocks and features four loading bays with a metal canopy covering the openings. The main façade features running bond brick with punched window openings. The entry volume has large plate glass aluminum framed windows with a small concrete platform and floating stairs leading to the main entry off of Clark Avenue. Also on this volume, the brickwork switches to blue running bond with some visible damage.

St Louis building permit GG2557, 3/5/1962: "Office building." Hunter-Hunter Assocs., architect; Allied Builders Corp, contractor.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This free standing single-story building has a square footprint and a projecting covered entry with awning. The concrete slab above the entry is cantilevered, and there is a similar condition extended along half the Ewing Ave façade of the building with cut-out concrete blocks forming the wall. The second half of this façade features running bond white-washed brick with the occasional slit window stretching from foundation to cornice. This pattern is echoed on the main façade as well as on Clark Ave. The fourth façade is white-washed brick devoid of fenestration, but for the occasional door.

Originally Deaconess Hospital - Original building and boiler house built 1929-30. The Sister's Home to the west was added in 1942. The Gerhold School of Nursing in 1946, and the Chapel and the South Building in 1956. Other additions were added from the 1950's-90's. The original building was altered significantly in the 1980's, as was the South Building. The other buildings remain fairly intact. They are blond brick buildings with relatively simple detailing.

ARCHITECTURAL/HISTORIC INVENTORY FORM

5535-55 DELMAR BLVD

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

Originally St. Luke's East Hospital Complex (now Smiley). Additions started in 1952. A Nurse's Home & School were added in 1959 and a medical office building in 1964. A new one-story façade was added in 1969. The buidlings are blond brick with varying numbers of stories. Façade addition has flat projecting metal awning. What is now known as the "west Annex" has concrete pilasters that run the height of the building.
