History Notes

This house was built just after the Second Baptist Church was moved from this lot in late 1894 or early 1895. (Church minutes show the church building was moved between November 1894 and February 1895.)

It was the first house in the city to have running water; parts of the original water tank are still in the attic. It was also the first building to have an "acetylene gas plant", which Fleet installed in 1909 (Owen Binder)

The original spindled front porch was redone ca. 1915. Interior changes made in the 1910s or 1920s include a fireplace and bookcases in the living room.

The office and house plus two other lots to the north were still owned by Mrs. Fleet in 1917. The property was listed in her name only in all available real estate tax records. The City of New Franklin owned it in 1947.
