22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

City of St. Louis Building Permit EE1243, 1/15/60: "Drive-in bank for Baden Bank, owner." Arthur Brimer, architect. Builder JE Williams CC.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This single story free standing building with irregular footprint with stepped bays ws built as a drive-up bank. The building has a concrete foundation, brick cladding, and a flat roof with deep projecting eaves. The windows are in single bay with concrete above and below, vertically oriented panes. The main entry features a horizontal upper transom, with single vertical oriented windows flanking the entry.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

According to the BBEC website, this building housed the BBEC when first constructed, providing spaces for the architectural and engineering departments on the second floor and the accounting and financial departments on the first floor, along with meeting rooms for clients; 55,000 sf total. The company's former offices, occupied since 1920, were on Sidney Street and remained the home of the Loughman Cabinet Division's manufacturing shop. President Joseph Gander's office is oval shaped. All cabinets and furniture were custom-built and "a cabinet-maker's dream."

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

"Defining Downtown" BBEC website, accessed at http://www.midcenturybanks.recentpast.org/history/itemlist/search?searchword=Salvation+army

No building permits were found for this property.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Salvation Army Midland Divisional Headquarters building is a two story office building with a square footprint. It features a cantilevered concrete second story with ribbon windows and a flat roof. The street level façade is faced with red brick and random coursed ashlar with bays of four windows. The main entry, set under the cantilevered concrete, is centered in the façade and features polished stone tiles and a single aluminum framed door with transom window.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This two story brick office building, joined to the Salvation Army Headquarters building, features a square footprint, concrete foundation, brick cladding, and a flat roof. Two bays of decorative concrete screens flank the recessed entry bay on the main façade. The recessed entry also features floor to ceiling windows at both levels with a panel to mask the floor depth. The secondary façades feature double height bays punctuating the face with narrow windows at each level framed with aluminum. Simple stone and metal coping wraps the entire building.

1401-21 HAMPTON AV

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

Carpenter's Union Hall was designed by Study, Farrar & Majers. The interior was designed by the Bank Building & Equipment Corporation and includes various types of showcased woodwork. The building is architecturally significant as well as being significant for playing a part in the development of commerce in St. Louis, as one of the construction trades Union Halls. The building's Modern era styling is seen in its ribbon windows, its exposed concrete base, and its splayed portico columns.

The Carpenter's Union occupied a hall it built at the corner of Cozens and Grand in 1924 until it burned in 1953. During the mid-1940s, the Carpenter's District Council had nearly 6,000 members, making it the largest of the building trade unions in St. Louis. The Union broke ground for its $1.6 million headquarters building in 1956 and occupied the building in May 1958. The St. Louis Labor Council, as well as a group of union locals, occupies offices in the building. In 1981, the building was described as a landmark in the city where many events had taken place at the restaurant and banquet facilities. The use of the property as the campaign headquarters for the Right to Work state legislation in 1978 was also noted.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

City of St Louis Building Permit #A7688, 7/20/56, but this may be an addition. "Addition" listed as 8/15/50, may be original. Study, Farrar and Majers, architect; John B. Gutemann CC, contractor. Also S5740, 8/15/1950.

Also see BBEC website info on the building (BBEC did interiors only) at http://www.midcenturybanks.recentpast.org/architecture/featured-buildings/item/54-carpenter's-district-council-of-greater-st-louis-1958

St. Louis Labor Tribune, Carpenters' Commemorative Issue, August 27, 1981.

Also, see 1962 AIA directory for Benedict Farrar listing "Carpenter's Off Bldg, 58" for one of the firm's principal works:

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

Carpenter's Hall is a three-story brick building with one-story concrete base. The vertical entry bay with concrete surrounds extends all three stories and is coupled with a hip-roofed portico supported by tapered columns; this bay also has a projecting central sign. All the windows have concrete trim and mullions. The south end of the Hampton Ave façade features tall narrow 8-pane windows with no cornice and no first level windows. The north end of this façade has a projecting roofline with closed eaves, clerestory windows, small square windows evenly dispersed at center height, and square windows in the concrete base. The north façade repeats the same design but with a rounded projection of the concrete first level.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

Online newspaper articles (Jefferson City Post Tribune, Southern Illinoisan, Daily Capital News, etc) have ads as early as 1966 for help needed at Xerox corp. at 1425 Hampton. Therefore, the 1970 date may be incorrect.

No building permits were found for this property.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This free standing single-story building has a rectangular plan and is surrounded by parking and an alley. The main façade is slightly recessed with off-white brick wing walls that feature square cut-outs. 2/3 of the main façade is floor to ceiling aluminum storefront while the remaining 1/3 is stacked bond brick. The north façade is common bond brick and has three square windows with stone sills dispersed evenly at mid height. The south façade is comprised of concrete block with common bond brick cladding only for the length of the wing wall. The entire building is wrapped in simple coping.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

The building was formerly owned by the Metropolitan St Louis Sewer District. It is possibly endangered (see sources for blog post of February 2011).

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

See "Built Environment" blog at http://www.beltstl.com/2011/02/bldg-to-be-razed-on-hampton/

Also see "Appendix F" of the 2007 environmental assessment of the property done by the City, available online at http://stlouis-mo.gov/government/departments/sldc/documents/upload/2000%20Hampton%20--%20Phase%20I%20ESA%2010-31-07_PART%202.pdf

Also see discussion of expansion of the Hampton MSD office, discussed in Meeting minutes 1969, as being designed by architect Nolan Stinson Jr., accessed online (#0528) at http://www.stlmsd.com/aboutmsd/organization/boardoftrustees/proceedings

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This building is a large, 2-story brick office building with recessed entry. The entry bay has decorative buff brick panel and a concrete roof supported by two rectangular brick columns. The building extends out from both sides of the entry bay with concrete trim and geometric cut-outs at one end of the façade. The building is built into a hill, exhibiting two stories at side and rear, and ribbon windows at the side. There is also an asphalt parking lot approximately 69,000 SF in area.

Safe Connections. One-story brick veneer office building with asymmetrical façade and cast concrete coping has sustained considerable alteration, including the addition of a center semi-circular projecting bay with standing seam metal canopies to either side. Original windows and door have been replaced have been replaced; decorative metal screen installed. Difficult to ascertain original appearance of the front façade.

This building, currently housing SM Wilson Contractors, is a two-story irregularly shaped reinforced concrete structure. The street façade consists of brick with concrete pilasters delineating the window bays, each containing a 3-pane window with a stone sill. A large concrete portico supported by heavy concrete square columns leads to an entry tucked into a corner of the building. The north façade features a 2.5 story curved glass atrium with aluminum mullions. The façade to the atrium's west is similar to the street façade with bays. The façade to the atrium's east is recessed slightly exposing heavy concrete columns and full-length clerestory windows.

The Electrical Industry Training Center building is a collection of union trade offices. The rectangular building has single and two story portions as well as two stories. The main façade features red brick with a band of ribbon windows with brick sills on both sides of the entry. The secondary façade features sporadic fenestration and the main entrance as well as a garage door. Both street facades are the single story portion of the building. The two-story area is the back corner and is clad with metal sheathing. The main façade of the single story and the front three sides of the two-story both feature shallow parapets.

This two-story rectangular office building has a concrete foundation and a flat projecting roof with cornice along the front volume of the building. The recessed primary façade has a curtain wall entry with a block concrete support column. A glass block ribbon window extends over the length of the primary façade to one side of the entry, with a single band of high fixed row windows along the recessed secondary façades. The back volume of the building has secondary concrete block façades with recessed window bays, each with a single window with a stone sill per floor and per bay flanked by full height bands of projecting brick.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This office building is a rectangular two-story block with low gable roof and alternating planes of brick and curtain wall. A free standing brick chimney extends through the low gable roofline, and anchors the building entry canopy which projects horizontally from the wall towards the street. The aluminum framed curtainwall at the entry is an extension of the primary façade's curtainwall.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

St Louis building permit 4/26/1960: "two 2-story office buildings 40x120 each" Kenneth E. Wischmeyer, architect; SC Cach, owner and builder.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

A pair of two-story brick commercial buildings on this property are mirrors of one another, both facing a central parking lot. They feature brick cladding, glazed storefront systems, concrete pilasters and open concrete stairs and balconies. The projecting roofline and balcony have coffered soffits. Both buildings also feature 6 equal bays at each level with 5 windows within each bay. Additionally, the back side of each building has a projecting second story with alternating bays of storefront windows and brick in a different rhythm than the front facades.

Swedish Evangelical Lutheran Church

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

St Louis building permit R9711, 2/27/1948: "Church on existing foundation." Theo Steinmeyer, architect; William A. Reindl, contractor. Also EE5390, 10/24/1960.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Gethsemane Lutheran Church has two primary components; a two story chapel and a sunken two story rectangular rectory to the east. Both portions of the building feature brick cladding and a combination of flat and cross gable roofs. The chapel features a red brick accentuated entry bay with concrete framed double doors. To either side of the brick are stacked recessed slit art glass windows in concrete surrounds. This pattern is repeated on all chapel façades. The rectangular building features blond brick with punched window openings, a projecting entry featuring a rounded arch recession with decorative mosaic tile surrounding the doors, and a stone belt course between the main and half-sunken lower levels. Both buildings have terra-cotta tile roofing. The rectory features a copper cupola and the chapel a ladder-shaped spire.

City building permit #H7912, 1/9/1954. Gerhardt Kramer & Assocs, architect; Swan CC, contractor. "Kroger Super Market."

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This building, currently housing Bank of America, is a single story rectangular building with concrete foundations, mottled brick cladding, historic windows, and a flat roof. The entries on the east and west façades feature cantilevered roofs projecting up and extending over the main roofline and supported by two brick pillars. The roofline overall consists of a thick cast-concrete cornice on all facades aside from the south. The north façade has bays of 5 slit windows, each separated by brickwork, directly under the overhang of the concrete cornice. The south façade is devoid of fenestration.

City building permit #GG1249, 11/10/1061. King & Murphy, architects; Magu [ ] Development Corporation, James Beaver/Horn Realty, owner. No contractor specified.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This commercial building is a sunken 3-story day-lit basement rectangular building. The street façade features a two-story glass curtain wall with stone cladding framing each window, creating tubular symmetrical boxes. A small metal canopy and stair mark the main floor entry. The side facades feature gray brick and are void of fenestration. The south façade has equal bays of square windows on the upper two floors as well as an emergency staircase.

ARCHITECTURAL/HISTORIC INVENTORY FORM

5022 HAMPTON AV

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

Highly unusual as one of few remaining Midcentury service stations retaining architectural integrity. Building originally erected as a service station in 1937 for Texaco. Owner was Dorothy Falkner. Cost: $5,000. Façade alterations were completed in 1967 by Texaco for $3,000, including canopy and roof overhang.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

Building Permit #h7932, 10/20/1937.
Building Permit #d3406, 10/8/1937 for Texaco.
Building Permit #d3998, 10/10/1967 for Texaco.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

One-story, flat-roofed service station constructed in 1937 then completely re-skinned with porcelain panels in 1967. Projecting canopy over original pump area. White porcelain panels with narrow black-striped panels rimming parapet and outlining canopy. Aluminum storefront with original entry door and transom. Midcentury alterations are completely intact, including box lights under canopy.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This building, now housing a record store, was originally built as a library. It is a rectangular steel structure with concrete foundations, brick cladding, historic fixed windows, and a flat, projecting roof. It has a mezzanine level on the interior, with a 100-seat capacity assembly room. The overhanging eaves are supported by open bar metal pilasters which divide the building into bays. The building has a granite base with running bond blond brick cladding and tall 3-part windows centered in each bay. The entry sequence includes brick retaining walls, stairs, and white metal decorative railings. The entire building is capped with a simple white cornice and coping. On the interior, a striking mobile by Fred Dreher hangs in the vestibule. It is called the Pomegranite Mobile, and is 11.5' by 8' in size, with 35 separately moving units made of aluminum, steel, and beveled plexiglass.

This two-story mixed use commercial block has a rectangular plan with a central entry. The Hampton façade features two glazed storefronts on each side of the central entrance below a projecting metal canopy dividing the two stories. The upper story has evenly-spaced square windows along the façade. At the center of the main façade is a slightly projecting composite masonry panel, extending from base to roof line, with a window filled with glass block in the upper story.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

A new home for the elderly was constructed where an older facility had stood since 1873. The new home held its groundbreaking ceremony in March 1969, and the facility was occupied by June, 1971.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

http://www.littlesistersofthepoorstlouis.org/index.php?option=com_content&view=article&id=52&Itemid=27

City of St. Louis Building Permit E3443 - 4/22/1969, A.F. & Arthur Stauder; Hercules Construction Co.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Little Sisters of the Poor complex contains an 8-story apartment tower with attached L shaped three story wing, as well as several small free standing structures. Built as, and still used as, a nursing home for needy elderly, the complex features multiple blond brick buildings. The tower features even bays of horizontal windows separated by concrete pilasters and concrete panels under each window. The short ends of the tower feature blond brick and concrete with no fenestration. The connected L-shaped wing is broken by vertical planes of windows divided by clear glass and black spandrel glass panels all framed in aluminum. Both buildings have a large flat concrete cornice.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This building is a large single story office building with a warehouse. It has concrete foundations, brick and concrete block cladding, and a flat roof. The brickwork is punctuated by slightly recessed painted brick spandrel panels above and below the four-pane windows. There is a shallow projecting canopy over the entry, which is centered in the northern façade and features floor to ceiling aluminum framed windows. The warehouse has exposed concrete block cladding and punched opening windows with stone sills.

This one-story duplex office and warehouse building, currently housing the St Louis Community College Art Annex, is a small rectangular building with concrete foundations, orange brick cladding, historic windows and a flat roof. It is a concrete block warehouse fronted with a brick duplex office with a slight parapet wall. Both entries on the street façade have concrete stairs, aluminum storefront systems and green cloth awnings. Between the two entries from the top of the windows to ground level is clad with patterned concrete blocks. The sides of the brick office area feature small windows with brick sills. The taller warehouse soace on the north side is concrete block. The building appears to have been constructed at the same time and using the same plan as its neighbor to the east, 5427 Highland Park Dr.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

Originally constructed as a laboratory.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

Building permit #GG548 9/27/1961. "Laboratory." James L. Willingham, architect; Lee A. Patterson, contractor.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a one-story very simple red brick office with an asymmetrial 3-bay facade in front of warehouse extension. Slightly projecting, narrow limestone window surrounds are placed around two horizontal two-light fixed winodws. The entrance is a full-light aluminum and glass entry door. There is a narrow metal coping and the building displays a concrete sill/foundation. The sides of the building are brick with small, square windows. The front sidewalk approaches the building at an angle.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

One-story brick office in front of concrete block warehouse. The asymmetrical facade has an aluminum/glass storefront and entry in the east half. A few storefront windows have been covered. There is a slightly-projecting flat metal awning above. Most of the remaining façade is covered in patterned dog-eared variegated brick creating a decorative relief panel. There is a metal coping at the roofline and the building has a concrete foundation. The rear concrete block section is slightly taller than the office in front and has high, square and rectangular fixed windows. A cornerstone at the right side of the front facade says "Douros 1963."

City of St Louis building permit A6742, 4/10/1963: "Office in front of other use." Builder Wm. Douros/ Douros Realty Co.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This structure is a low, single story duplex office building with warehouse space at the rear set back from the street by as small paved area. The front portion is brick with concrete block at sides and rear. A small courtyard is formed around the main entry by two sets of curved decorative concrete block screens. The side-by-side entries are centered on the façade, flanked by large windows, with a barrel-vaulted awning, probably a later addition, extending south. The remainder of the main façade is brick which wraps each corner symmetrically.

City buiding permit #C5037, 5/26/1966. School. William B. Ittner Inc. Architect; Kloster Co. Contractor.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This school building is a three-story rectilinear building with the upper two stories of classrooms differintiated from the base. The reinforced concrete structure has concrete foundations, brick cladding, multi-pane windows and a flat roof. The building is largely supported on angled piers with angled lintels. The ground level is deeply recessed, with a central projection beyond both the north and south façades. The east and west façades are exposed-aggregated panels while the north and south façades are continuous banks of windows separated by concrete piers and beams. The ground level has blond brick with concrete foundations and bays of windows as well as clerestory windows and aggregate panels.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

This warehouse structure has suffered from neglect, so at this time is considered to be non-contributing.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

City building permit #A9352, 11/16/1956. No architect listed. A. J. Will, contractor. Permit may be for loading dock.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This small rectangular building, owned by R&N Used Autos, is a single story concrete block warehouse, with full-length loading dock with five bays and a concrete foundation. All 5 loading doors are wood and the canopy above is supported by steel truss structure. A utilitarian design, this building features no ornament and only one window near the front door, both protected by metal.

Tim Fox, ed., Where we Live: A Guide to St Louis Communities,(St Louis: the Missouri Historical Society Press, 1995) p. 101.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Holy Family Parish Center, Marian Middle School, is a rectangular two-story building with pre-cast concrete barrel vault roof sections and a single-story entry with a prominent low profile flat concrete roof, cantilevered to delineate the entry. The structural columns and roof are emphasized by recessing solid brick panels behind the face of the columns. Ribbon windows at the top of the secondary façade brick walls also create the appearance of the roof floating above the walls.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

This church building was part of the Polish parish of St. Hedwig of the archdiocese of St. Louis, now closed. It is currently the St Louis Harvest Church since 2005. The architect was J.T. Golabowski, and construction date was 1957. Its design is architecturally significant as an example of Modern design, in its simple masonry wall planes broken by vertical slot window openings and relatively formalized, concrete entry surround. It may also be significant for playing a part in the ethnic heritage of the Polish community in St. Louis.

The number of Polish immigrants, over 2,500 in 1900, was sufficient to support two Polish ethnic parishes, St. Stanislaus on the north side and St. Hedwig on the south side. August Marchlewski purchased land for the church near his home at 4747 Nebraska Avenue in the Mount Pleasant neighborhood, an area where Poles could buy land and operate truck farms. The first mass at St. Hedwig's was held in 1904 and soon the parish had its own school and the beginnings of a parish complex.

The Mount Pleasant neighborhood still had vacant lots at the end of World War II. Polish American veterans and others built in the neighborhood and St. Hedwig's parish grew to the point it needed a new church. An architect from northern Indiana, J. T. Golabowski, provided a contemporary design for the church at the corner of Itaska Street and Compton Avenue. The parish flourished and had 500 families in the mid-1970s, half of them of Polish heritage. The Archdiocese's consolidation program in 2005 resulted in the closure of St. Hedwig Parish and the property was sold.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

City of St. Louis Building Permit #CC890, 9/16/57. Golabonski, architect; C. Rallo CC, contractor.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The church is an irregularly shaped building with a double-height entry bay and a tower to the east. It was designed by J. T. Golabowski as part of the St. Hedwig parish of the archdiocese of St. Louis. The main entry is framed with pre-cast concrete panel surround. The verticality of the entry bay is emphasized with narrow two-story piers symetrically placed on either side of the entry. The south pier is a curtain wall with aluminum spandrel panels modeling the tower design.

21.(cont.) History:and significance. Expand box as necessary or add continuation pages.

The Mark C. Steinberg Memorial Skating Rink and Recreation Building was designed by Frederick Dunn & Associated Architects. The facility may have been one of the first racially integrated public venues in St. Louis. The building has a full-glass wall and roof terrace to provide a view of the rink, and ashlar walls. Two-thirds of the $935,000 cost of the rink was a gift from Etta Steinberg, in memory of her late husband. The rink is reported to be the largest outdoor skating rink in the Midwest. The building exhibits the characteristics of the International Style, with stripped, boxy shapes and the horizontal length of the full-height glass wall.

22. (cont.) Sources of information. Expand box as necessary or add continuation pages.

Frederick Dunn listing in Missouri.org history site, http://stlcin.missouri.org/history/peopledetail.cfm?Master_ID=889

City building permit #A7803, 7/30/1956. Frederick Dunn, architect; Robert Paulus CC, contractor.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The Mark C. Steinberg Memorial Skating Rink, designed by Frederick Dunn & Associated Architects, features a rectangular single story building with a flat roof known as the Steinberg Café. It has concrete foundations, ashlar walls, and a historic aluminum window wall with a view of the rink. The south façade has brick cladding with a row of slit windows.

St Louis building permit A9959, 8/24/1963: Ralph R. Hohlt, architect; builder listed as Wm. H. Nelson Cunliff Co.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This two story office building features a rectangular footprint, concrete foundations, and brick cladding with replaced windows and a flat roof. The main façade has six bays, five of which are floor to ceiling windows with a narrow strip of brick between each bay. The entry features a small rectangular canopy at the first story ceiling height. The last bay is entirely brick, with no openings, as are the side and back facades with the exception of the occasional metal door. The secondary façade features five more window bays with the same details as the primary façade with the remainder of the length being brick.

Building Permit: C5687 6/27/1966 Construct 1-story brick building, $111,390.

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This office and film exchange building has a façade dominated by the contrast between the dark colors of the raised foundation, exposed framing elements, and window areas, and the light-colored brick panels that enclose most of the façade. A dark-colored aluminum storefront system forms a corner entrance area on the south end of the Jefferson Street façade; similar materials are used in window bays. The façade is set back on the south end of the building facing Jefferson. Broad panels of the light-colored brick veneer the north side façade facing Walnut Place.

City of St Louis building permit #C771, /13/1965: "Fortune Jefferson Redevelop. Corp. Martin Bloom & Associates, B 15 N Brentwood; Walter Geil, E; no architect listed; office and warehouse for General Fireproofing Co., $80,000"

40. (cont.) Description of environment and outbuilding. Expand box as necessary or add continuation pages.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This free standing building has a rectangular footprint with a recessed entry area at the front corner. One story in height, the building has concrete foundations, running bond brick cladding, and a flat roof. The windows, which may have been replaced, are in bays of four vertically oriented panes. Over the main entry there is a metal awning supported by metal posts. Metal drain pipes punctuate the facades in equal bays of approximately 30’ and the south façade is devoid of fenestration.

This single story free standing building features a rectangular footprint, concrete foundation, brick cladding and a flat roof. The Jefferson façade has a recessed window bay of 17 3-part windows, all vertically oriented. The concrete foundation extends up to the sill height here and the windows extend to the roof making this area void of brick. On the Clark Ave façade the brick work alternates from red to white-washed and the white-washed bricks are recessed by one width. The entire building features a simple white cornice with metal coping.
